Many Witnesses to Come.

The Burlington hearing on the physical valuation of its property in this state will begin in the offices of the state railway commission tomorrow. Much of the detail proceeding of the hearing will be eliminated, particularly that part over which there is little or no difference as to the conclusions arrived at the state's engineers and by the company's engineers. According to E. E. Reed, right-of-way expert with the state railway commission, in the neighborhood of 800 witnesses are to be heard on the railroad's side protesting against the land valuations which have been given the Burlington's property in the state. The hearing, it is expected, will consume several days and an unusually large amount of testimony will be taken by both the company and the state.—Lincoln Journal.

Lost a Section of Land.

Mose Henry was called to Mr. Resigue's to assist in saving the stables and corn cribs, and he will commence work as soon as possible. Mr. Henry says that twenty-five years ago he was called by Mr. Resigue to move his house, which he did, and that time there was a full section of land between where he placed the house and the river. Now all that land is gone. The last time Mr. Resigue was compelled to move he went to the south line of his land. The old orchard has gone, and the new one is fast following. Mr. Resigue will place his buildings on some of the adjacent land, and then look for a new farm to purchase.—Nebraska City News.

The Board of Control. A gentleman living in a state where a constitutional amendment has been adopted and which has placed all public institutions under a board of control and taken them out of politics, says: "I notice that the Nebraska voters have an opportunity to take out of the hands of the politicians and grafters all public institutions and place them in the hands of a board of control. This law has worked wonders in all of the states that have adopted it and that I have visited and examined its workings. It places good men in charge and they remain in charge just so long as they make good and improve the condition of things. The institutions are operated at much less cost than under the political control, besides the inmates or others get better treatment and all are on their best behavior."
