THE CITY DOING SOME MUCH NEEDED WORK ON NORTH FOURTH STREET

From Tuesday's Daily. The city is now engaged in doing some very much needed work on North Fourth street where the street has been filled with ruts and washed out places for some time and the ditches are being opened up there of the side of the roadway that will permit the passage of the water from the hill and keep it from washing out the street. The street is being graded up in better shape, and when completed will make this street one that will be vastly easier to travel over than before. The hills make the work on these streets very difficult to handle and especially so when the city has only a small amount to expend in road work and with what they have on hand the work is carried on quite rapidly.

"DON'T LIE TO YOUR WIFE" AT THE PARMELE THEATRE TOMORROW (FRIDAY) NIGHT

If Campbell B. Casnd, the author of "Don't Lie to Your Wife," which will be seen at the Parmele theatre tomorrow (Friday) night, hadn't been arrested for speeding his automobile, that merry semi-musical farce would never have been written; like all newspaper men when cornered in some complication, he has made the most of the opportunity, as rapidly as the

complications of a humorous nature occurred to him. The author while waiting for a bondsman jotted them down, weaving them ultimately into one of the best farces that has been offered to the theatre-going public in a long time.

The scenery is the same model as used in the four months' run at the Whitney opera house, Chicago, and is rich and showy. The supporting cast are all competent farceurs and types prevail, and not the least interesting to the ladies will be the quality of gowns exhibited during this engagement.

There are specialties and musical numbers introduced during the action of the play by an exceptionally pretty chorus who have received much press comment for their ability, both as dancers and being able to sing.

A Sound Advice.

We received a letter from Mr. E. Vodansky of Belle Fourche, S. D., which we gladly publish: "There is a Slovak family here. The mother was sick for a whole year, suffering mostly from her stomach. She could eat nothing and her death seemed to be inevitable. Physicians advised to try an operation. I told her husband about Triner's American Elixir of Bitter Wine and ordered some at once. After four bottles the lady feels healthy, has good appetite and can do her house work. I had myself a poor stomach, but after having used two bottles of that medicine am feeling now much better." It is a well known fact that Triner's American Elixir of Bitter Wine is a carefully and scientifically prepared remedy for loss of appetite, constipation and its consequences. Price \$1.00. At drug stores. Jos. Triner, Manufacturing Chemist, 1333-1339 S. Ashland ave., Chicago, Ill.

COMMENCED PRACTICE FOR THE PRODUCTION OF "PRINCESS BUL-BUL"

The musically inclined young people of this city, under the direction of Miss Mathilde Valley, are rehearsing on a new production, "Princess Bulbul," which will be given at the Parmele theatre in a short time. All of the talented young people of the city have been secured to take part in this delightful operetta, which will be a greater success than was the "Merry Millmaids," given two seasons ago under the direction of Miss Valley. The music of the operetta is very catchy and in the production a number of the late song hits will be given. The operetta will be given for the benefit of the Episcopal church and gives promise of being one of the most enjoyable that has ever been offered in the city on a similar occasion. There is hardly any town in the state of this size that can boast of better musical talent than Plattsmouth, and the "Princess Bulbul" will have the benefit of the efforts of the young people of the city.

The Strongest Fence

Science proves that the strongest fence, because constructed throughout on scientific lines, is the

ELLWOOD FENCE SIMPLE-SCIENTIFIC-STRONG

The Reasons: 1st—Each horizontal extension of the ELLWOOD is a steel cable, consisting of two heavy wires intertwined. 2d—Each of these cables is tied to each other cable by a continuous heavy wire lapped tightly about every cable—not tied in a crossed "knot" or twist to weaken the strength of the wire at the bending point. (Wrap a wire around your finger and the wire is not weakened; tie a wire up in a "knot" and you cannot untie it without breaking, it is so much weakened.)

THAT IS ALL THERE IS TO ELLWOOD FENCE—

Heavy steel cables lapped about and held together by steel wire, forming uniform meshes. Simple, isn't it? No chance for weakness in any part; uniformly strong. The reasons for the superiority of ELLWOOD FENCE are not hard to find. This company owns and operates its own iron mines and furnaces; its own wire mills and six large fence factories—either one of the six being larger than any other fence factory in the world. These facts should be convincing.
