# Cole's Uriginal Hot Blast Heaters

A Coal Stove in which the fire is not out from the time it is set up in the fall until taken down in the spring; which demands attention only three times in twenty-four hours with soft coal and only two times with hard coal, and which gives a uniform heat day and night with soft coal or hard coal.

FIRST-Experiments showed that one-half of the carbon available for heat in soft coal and a large per cent of the carbon in hard coal, gas, which is allow to escape up the chimney with the smoke, in the ordinary stove. To overcome this loss of fuel and to prevent the loss of smoke and soot into the room it was necessary-

FIRST-To invent a construction for a stove, absolutely airtight, and which would remain airtight year after 💢

SECOND-To invent a draft that would exidize and burn the GAS in the coal after being controlled by aurtight construction.

#### The Factory's Remarkable Guarantee-

1-To guarantee a saving of one-third in fuel over any lower draft stove of the same size, with soft coal, stack or lignite.

2-To guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with the same fire pot.

3-To guarantee that the rooms can be heated from one to four hours each morning with the soft or hard coal put in the stove the evening before.

4-To guarantee that the stove will hold fire with soft coal from Saturday evening to Monday morning

5-To guarantee a uniform beat day and night with hard coal, soft coal or lignite.

6-To guarantee every stove to remain airtight as long us used, 7-To guarantee the feed door to be smoke and dust

proof. 8-To guarantee the anti-puffing draft to prevent

We will fulfill the factory guarantee and should any stove not do the work as guaranteed when operated according to directions, we will refund amount paid and gladly take the stove back.

Once a User You Sure Will Be a Booster for Cole's Original Hot Blast Heaters!
