A farm hand employed by George Shrader about eight or ten days has taken to the high weeds. When Mr. Shrader departed for Murray Tuesday morning on a little business everything between him and the hired man was lovely as could be, seemingly. The man stayed with the plow until after he had brought the team in for the noon hour, and had eaten his dinner. Some of the neighbors who had seen the man before noticed him making good time for Union and called up the Shrader home and asked if the man was leaving. The reply was that not as they knew. He was supposed to be out in the field, but upon further investigation it was found that he had gone. He never said a word about leaving, and after looking around over the house and barn nothing was missing, so Mr. Shrader it out only the hired man, which is probably a good riddance, as help that you cannot depend on is worse than no help at all.

Build It of WHITE PINE

Whether you're going to build a home, barn, garage, or henhouse, White Pine will give you longest service and greatest satisfaction. No wood equals White Pine for all exposed surfaces. Three centuries of building experience in America prove this. It does not warp, sag, twist or split after years of exposure even in closest mortises and in delicate mouldings.

WHITE PINE

believe it is difficult to obtain. Such is not the case, as the ample stocks in our yards bear witness. And its longer service makes it most economical, even at a slightly higher first cost. Get our prices on this king of all structural woods and—if you don't already know its advantages—let us tell you more about them. It costs no more to buy your lumber at home—often less—freight considered, and you can see what you get before you pay for it. Then, too, we are "on the ground" to serve you—always as near as your phone.
