Catarrrhal Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, etc. F. J. CHENEY & CO., Toledo, O.

JACOB MILLER KILLED AT MANLEY TUESDAY BY A M. P. TRAIN

Yesterday morning, Jacob Miller, who for the past few years has conducted a livery barn at Manley, met death when he was struck by the north bound Missouri Pacific passenger train a few miles north of Manley.

Mr. Miller had been engaged in mowing weeds along the right-of-way of the railway, previous to the accident that resulted in his death, and it would seem that he was struck by the train while endeavoring to prevent his team from getting on the track and in the way of the oncoming train. The team had been driven to one side and were very restless and hard to control and Mr. Miller in quieting their efforts to get away was thrown or fell backwards just as the train travelling at a good rate of speed came by and hurled him to one side resulting in his death almost instantly. The unfortunate man was struck about the head and shoulders but was not badly disfigured by the accident and the blow on his head which resulted in his death was apparently a most severe one. The accident occurred about 10:00 o'clock and at once the authorities were notified and came from Eagle where they were looking into the death of Hugh Spangle at that place. Coroner J. F. Brendel summoned a jury and an inquest was held fixing the cause of the death of Mr. Miller at being struck by a train but releasing the railroad company from responsibility in the matter. Mr. Miller was married and leaves a wife and two children, all residing at Manley. Mr. Miller was a man of about fifty years of age.

CHURCH SERVICES SUNDAY.

MONARCH SIGNS OF FALL

Now that Fall is near it's time to think of that new Range. Don't put it off another year, you can't afford to.

Of course the old range will hang together another year but what's the use? It's eating its head off every day that you continue to use it. Its stove putty is gone long ago—its joints are open and that means waste.

Suppose you could cut your fuel bills in half—how long would it take to pay for a new range with what you save?

Well, that's just what a MONARCH Range would do. That is a fact and the reason is because a MONARCH Range is air-tight in every joint. But it's not made tight with stove putty like your present range was when new. MONARCH Ranges are riveted tight. The iron is Malleable Iron, that means unbreakable.

That's how these joints can be riveted—while the hammering that builds a MONARCH would smash the grey iron castings of a common range into a thousand pieces. It's all a question of Rivets vs. Stove Putty. Which kind of Tightness do you want in your Range?

Get the booklet "Rivets vs. Stove Putty" and learn why the MONARCH is superior to other ranges. Come in and let us show you.
