They report the hunting good and say that they had a dandy good time. Clyde says they brought back 165 ducks, real ones, no decoys, and so many chickens that they could not count them all after dark. Of course it is understood that these chickens are all wild ones, but when we were told that they could not be counted accurately after dark, it gave us a slight impression that some of them might have been other than wild. Well, the boys earned all they got anyway and say that they are going again next year.

SHORTER APPLE CROP THIS YEAR

However, Yield Will Average Two Barrels Per Capita, Bureau Estimates.

Washington, D. C., Sept. 25.—There will be nearly two bushels of apples in the United States for every man, woman and child in the land, according to the estimates of this year's apple production made September 1 by the bureau of crop estimates, United States department of agriculture.

The bureau estimates this year's crop at 67,679,000 barrels of three bushels each—an agricultural barrel, not a commercial one—which is nearly 10,000,000 barrels less than the 1915 crop of 76,679,000 barrels.

This year the Baldwins have taken the lead from the Ben Davis, which led last year. The Winesaps come third.

The Greenings promise 3,739,000 barrels, an increase of 4 per cent over last year. Iowa's Greenings will fall to 81,000 barrels, a little less than half the 1915 crop.

After the Northern Spy comes the Wealthy, which will probably produce only 2,863,000 barrels, 13 per cent less than last year. Minnesota's Wealthy orchards promise 140,000 barrels, an increase of 1 per cent over last year, which is a wonderful gain considering that Wisconsin only promises 215,000 barrels, a decrease of 43 per cent and Iowa only 200,000, a decrease of 48 per cent.

After the Rome Beauty is the Jonathan, promising 2,432,000 barrels, a reduction of 46 per cent from last year's crop. Nebraska's Jonathans promise only 62,000 barrels, which is less than a third of the 1915 crop.

PRINCE the national joy smoke ALBERT

R. J. Reynolds Tobacco Co., Winston-Salem, N. C. Copyright 1916 by R. J. Reynolds Tobacco Co.

P. A. puts new joy into the sport of smoking!

YOU may live to be 110 and never feel old enough to vote, but it's certain-sure you'll not know the joy and contentment of a friendly old jimmy pipe or a hand rolled

cigarette unless you get on talking-terms with Prince Albert tobacco!

P. A. comes to you with a real reason for all the goodness and satisfaction it offers. It is made by a patented process that removes bite and parch! You can smoke it long and hard without a come-back! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Prince Albert affords the keenest pipe and cigarette enjoyment! And that flavor and fragrance and coolness is as good as that sounds. P. A. just answers the universal demand for tobacco without bite, parch or kick-back!

Introduction to Prince Albert isn't any harder than to walk into the nearest place that sells tobacco and ask for "a supply of P. A." You pay out a little change, to be sure, but it's the cheer-fullest investment you ever made!

EDWIN JEARY IN CITY.

This morning Hon. Edwin J. Jeary, of Lincoln, was in the city visiting for a short time with his many old friends, and while here was a caller at the Journal headquarters, where he made a most pleasant call. Mr. Farmer,

READ THESE PLAIN FACTS!

DOES PROHIBITION IN NEBRASKA HURT THE FARMER?

Will the Saloons and Breweries in Nebraska Cause Your Land to Produce a Single Bushel More Corn Per Acre Than Would Be Produced Without Them?

The Federal Government statistics show that, in 1915, the Distilleries of Nebraska produced 1,659,946 gallons of distilled spirits. One bushel of corn will produce 4.88 gallons of whiskey. There was CONSUMED in the manufacture of DISTILLED SPIRITS IN NEBRASKA, in 1915, 301,815 bushels of corn, and 37,896 bushels of rye and all other products.

The total corn crop produced in Nebraska, in 1915, was 228,094,736 bushels. For every 755 bushels of corn produced in Nebraska, in 1915, one bushel was consumed by the Nebraska distilleries.

Now, Mr. Farmer, if you produced 3020 bushels of corn, in 1915, PROHIBITION would have left you the magnificent surplus of 4 bushels. If you had raised one more pig on your farm, in 1915, you would have faced a corn shortage, under prohibition.

In the opinion of THE NEBRASKA PROSPERITY LEAGUE, namely, (The Nebraska Saloon and Brewery League), prohibition would have meant your financial ruin. To you believe such rot?

One man drunk on a farm one day in the busy season is far more expensive to you, Mr. Farmer, than the loss pictured even by the Saloon and Brewery League. VOTE DRY.

Plattsmouth Prosperity League
