Base Burners and Heaters!

What can you get more enjoyment and comfort out of than a good Base Burner or Heater on those winter days that will soon be here? We can show you a complete line of Round Oak heaters, Monitor Base Burners and the Old Reliable Monarch Ranges, at prices that are absolutely right. While we handle other brands of stoves, we mention the above makes, as our choice of the whole bunch, and we do not believe you can buy better stoves no matter what price you pay. Come in and look them over, then tell us what you think.

Mike Trich, democratic candidate for county treasurer, was in Murray, Wednesday of this week, meeting and renewing acquaintances with his many friends in this locality.

The Hallowe'en pranks in Murray this year were pretty severe and the Main street of our little village looked as though some one or a number had been pretty busy most of the night. A great deal of loose property around the streets and in barn lots removed, some being placed on the Main street, and other articles hidden in various places over the city. In many instances property is greatly injured in this way and it is not right.

Mrs. Chas. Carroll and Mrs. L. L. Alix were Omaha visitors last Saturday. Mrs. Carroll went up to consult a specialist and is now receiving daily treatment in that city, making the trip home each day.

About four years ago we are informed that Good Todd purchased a high grade Matthewson automobile, at the price at that time of \$3,500. After being run the four years or less the car is sold this week to a junk man for \$75.00, who is simply removing the brass and aluminium from the same. This certainly proves that this class of car is not the economical one for this part of the country.

Your HUDSON SUPER-SIX Will Advance \$175

You who now own a Super-Six will gain in the increase—no change in models

Your Super-Six will be worth more next year. And those who buy them must pay \$175 more. When cars under way are completed, we must add to the price the added cost of materials. Price advances December 1st.

This is another unexpected attraction in the Hudson Super-Six.

The usual car, the first season, depreciates some 30 per cent. In addition to that, on latter models makers often reduce the price. So the one-year drop in value averaged 40 per cent or more.

The Super-Six motor—almost without friction—hardly depreciates at all. And that's the chief part of a car.

The Super-Six price will advance with materials, for we never shall lessen our standards. So December first, when materials on hand are exhausted the price will advance \$175. And you who own the Super-Six will share that added value.

No Pretensions

That very announcement will reveal the strength of the Hudson position. Most weaker cars, we believe, will not dare to advance. Some way will be found to avoid it. But the Hudson Company, on its Super-Six, will never make pretensions.

Hudson profits, considering our size and output, are very small indeed. They have always been so, and all insiders know it. Our very balance-sheet proves that our margins are minimum.

On December 1st, we start using materials bought under this year's contracts. Prices on all of them have advanced enormously.

On a Hudson-grade car makers can lessen the quality without making the difference apparent at once. But that would be treason to Hudson standards.

So we do—and do frankly—what is obviously necessary. We add the extra cost of materials.

No Advance on Sold Cars

You who have already ordered—either open or enclosed Super-Sixes—will get delivery at the price agreed—up to December 1st.
