LLOYD-GEORGE IS TO HEAD CABINET

Bona Law Refuses Invitation of King to Form New Ministry.

London, Dec. 6.—The Westminister Gazette says that A. Bonar Law declined the invitation of the king to form a cabinet and that presumably David Lloyd-George will be called on.

The Exchange Telegraph company says it has authority for the statement that Mr. Bonar Law has declined the offer to form a government.

The king has sent for Mr. Lloyd-George.

The public is awaiting with the greatest interest the next step in the political crisis. Ordinarily the selection by the king of a leader such as Mr. Bonar Law to form a new ministry would be taken as a solution, but from the first there was some doubt whether the unionist leader could succeed in the task assigned to him or whether he could command the support of a majority in the house of commons if he did form a cabinet.

The nationalists, who withdrew their suport from Premier Asquith because of his failure to carry out the agreement made by Mr. Lloyd-George for bringing home rule into force immediately, would hardly be likely to follow a cabinet of which the unionist leader was the chief and in which Sir Edward Carson, was included. It had been suggested their support might be obtained by granting their demands regarding Ireland, and it was even said Sir Edward was a party to this, but the Nister leader telegraphed to his suporters in Belfast a denial of the report, saying:

"The proposals attributed to me are without foundation. Ulster men know my views and my unabated loyalty to them."

Another difficulty was presented by the labor party whose leader, George Wardle, announced yesterday the intention of the labor members in the house of commons to support Mr. Asquith. They are meeting to take a final decision. The Manchester Guardian which generally voices the opinion of the provincial members, expressed the opinion that Mr. Bonar Law would be more likely to effect a combination which the house of commons would support than Mr. Lloyd-George would be and added there was no reason to believe Mr. Lloyd-George had any ambitions for the task. The Guardian which supports Mr. Lloyd-George, says that in a letter to Mr. Asquith he took the stand that a man could not act both as premier and as a member of the war council which would have to sit morning and evening and deal with the "terribly urgent" war problems.

The hope is expressed generally that an election will be avoided on account of the delay and interference with the business of war. Should an election become necessary it will be held under a three year old register so that 4,000,000 new votes would be disfranchised.

BIG INCOME TAXES SHOW PROSPERITY

United States Collects $124,037,252, Increase of $44,735,493 in Fiscal Year.

Washington, D. C., Dec. 6.—Prevailing general prosperity in the United States is best reflected by income tax collections of $124,037,262.61 for the fiscal year ending June 30, 1916, an increase of $44,735,493.75 over the $80,201,758.86 collected in 1915, according to the report of Secretary of the Treasury McAdoo, made public today.

Of this amount, collections of personal income taxes amounted to $67,043,404.63, and of corporation income taxes $56,672,720.88. These were increases of $26,897,432.54 and $17,828,189.17, respectively.

Proof of general prosperity, says the report, is in the fact that, although corporation incomes have increased greatly, wages have been raised in many industries.

Fundamental Conditions Sound.

Fundamental economic conditions never were more sound, Secretary McAdoo continues. The United States has been transformed from a debtor into a creditor nation with the largest stock of gold ever held by any country —$2,700,156,076. Credit resources havebecome more than sufficient for the needs of this country, with the result that vast amounts of credit have been extended to other countries.

Federal reserve banks now have resources of $650,000,000, reserves are more than $400,000,000 and more than $250,000,000 additional is held by federal reserve agents as special security against federal reserve notes. The reserve banks have about one-fourth of the country's gold supply.

Owing to the federal reserve bank system, the government was required to make no special deposits in 1915 and 1916 to facilitate movement of farm crops.

Meets Farmers' Needs.

The new farm loan act, says the report, will meet the needs of farmers for long-time credits, while the federal reserve law has given agricultural paper of six months' maturity an advantage over commercial paper, in that the former is eligible for rediscount by federal reserve banks and the former is eligible for such rediscount only when of ninety days' maturity.

The unprecedented total of $11,362,341,000 was on deposit in the 7,583 national banks on September 12, 1916, and at the same time these banks' actual cash holdings were $815,185,000. The twelve federal banks on November 10, held $414,148,000.

For the fiscal year, customs receipts amounted to $213,185,845.63 an increase of $3,309,172.42. Internal revenue receipts were $512,726,287.77, the greatest on record. Taxes increased on tobacco in all forms and on all liquors except the fermented sort.

Exports during the year amounted to $4,333,658,805, an increase of $2,768,589,330, and imports totaled $2,107,883,519, an increase of about $484,000,000.

Drug Law is Weakened.

There were 23,754 reported violations of the Harrison drug act during the year, and enforcement of the law was made difficult by an adverse decision of the supreme court. More stringent legislation to cope with the drug evil is recommended.

An appropriation is urged for repayment of fines paid by parties convicted under section 8 of the act, which was knocked out. Treatment by the government of drug users is also recommended.

Secretary McAdoo recommends that no expense be spared in the effort to discover the cause of the mysterious and deadly poliomyelitis, known as infantile paralysis.

Protest is made against pork barrel public building bills. Of the $180,000,000 spent for government buildings in the last twenty years, says the report, of war risk insurance, which expires the most has gone for expensive structures in small towns and localities where they were not needed.

The secretary urges separate bills to cover each building after investigation.

The government has been unable to collect $666,633.40 of the funds that were advanced to Americans stranded in Europe at the beginning of the war. The report says that some of these persons have flatly refused to repay Uncle Sam.

It cost $724,492,998.90 to run the government during the fiscal year, and receipts were $779,664,552.49, while the treasury balance on June 30 was $178,491,415.58. The report states that present revenues will be insufficient to meet the contemplated expenditures for the fiscal years 1817 and 1918.

Butter Frauds Increasing.

An increasing number of adulterations of butter is reported. Most of these are violations of the law prohibiting the sale of creamery butter containing 16 per cent or more of moisture. Many cases were found where dealers purchased butter from creameries, added from 30 to 50 per cent of water and resold the adulterated product as creamery butter. Many other cases were reported where oleomargarine was colored, without paying the tax of 19 cents a pound, and sold as creamery butter.

In the last three years, evasions aggregating $50,000,000 in the taxes on corporations and individual incomes, tobacco, liquor and oleomargarine have been discovered, and of this amount $22,569,576.47 was assessed for taxation.

Would Extend War Insurance.

Earnest recommendation for extension for another year of the bureau by limitation September 2, 1917, is made. The bureau up to November 17 has written 1,684 policies, covering insurance of $163,395,687, and the surplus of premiums paid over losses amounts to $2,367,657.23. Losses amounted to $833,924.60, from which salvage of $59,055.87 has been received. The net amount of risk November 17 was $14,610,345. While $100,000 was appropriated for the bureau, operating expenses total only $39,113.70.

Unless the bureau is continued, says the report, inability to grant war risk insurance on American vessels and cargoes will seriously injure American commerce.

Referring to the Pan-American Financial congress in 1917, the secretary says:

"I cannot over-estimate the value of these conferences in promoting friendly relations and enlarging trade and commerce with our southern neighbors."

PREPAREDNESS
How It Helps Coughs and Colds

Buy your bottle of Foley's Honey and Tar *now*, and quickly stop the coughs and colds of early fall.

Early fall brings croup, bronchitis, asthmatic breathing, troublesome night coughs, whooping cough, and tickling, irritable throat.

It aggravates the distressing cough of weak lungs, and the chronic coughs of elderly people.

It gives "snuffles" to infants and children and provokes adenoids and sore inflamed throats.

Give Foley's Honey and Tar freely. It is so soothing and curative, relieves hoarseness and puts a healing coating on the inflamed mucous lining of the throat. It stops coughing easily and quickly and relieves croup before this dreaded thing has a chance to really harm the children or scare the parents. The last dose is just as good as the first, and a less amount is needed than of any other cough syrup.

So see to it that you get only the original FOLEY'S HONEY AND TAR, for it is the only *genuine*, and contains no opiates.

Victrolas $15 to $150. Records and needles. J. W. Crabill. 10-17-d&w.

How Can the Vacuum Furnace Save ⅓ of the Coal?

Are all the furnaces good that are sold by the other stores? Sure, but they use one-fourth to one-half more coal in the cellar where it is not only wasted but is detrimental to the goods stored there.

See the outer casing on the Vacuum which keeps the heat in the upper rooms.

Again we can put in the Vacuum in one day and cut just one hole, saving $50.00 on this alone.
