Pitz and C. E. Heebner, County mittee of the Commercial house to Commissioners, Frank J. Libershal, the different stores yesterday, and insures the fact that there will be a company here on Main street that can be on the job in short notice and take part of the burden of the fire protection of the city from the shop oys upon whom the city has been dependent for the last few years for men for the fire department. This enlistment of new material in the department is a good move that cannot but add to the efficiency of the department and will recruit the department to somewhat its rightful membership. There should be at least fifty members in the department and as a fact there are only twenty-two at the last report given on the matter. A greater part of the older men have served their five years in the department and retired as life members and this makes it necessary to constantly keep adding to the ranks r order to maintain the department as it should be. The citizens in genyear commencing March 20, 1917, eral have a keen appreciation of the fire boys in the past and desire to encourage them in their work and to this end the additional members are being secured to help keep up the department to its full strength. With the new members to assist in the work there should be no better volinteer department in the state than

Milk in Winter.

10th day of April 1917

Why do your cows give less milk in winter than they do in summer? Just because nature does not supply them with grasses and green food. But we have come to the asistance of Dame Nature with B. A. Thomas' Stock Remedy which contains the very ingredients that the green feed supplies in season, only, of course, in a more highly concentrated form. We guarantee that this remedy will make your cows give more milk, and better milk with the same feed.
