**BOOST INCOME TAXES TO PAY COST OF WAR**

Senate Finance Committee Plans to Raise Part of Needed Fund This Way.

Over Two Billion Will Be Raised From Toll on Firm and Industrial Receipts.

Washington, D. C., July 29.—The senate finance committee reached a tentative agreement late today to revise the present \$1,670,000,000 war tax bill so as to raise at least \$1,943,000,000, the larger part of the increase to come from higher income taxes.

Members of the committee said it is possible the total before it gets to

the senate will be \$2,000,000,000. About \$230,000,000 of the increase will be obtained through higher income tax rates—\$70,000,000 for the individuals and the rest from corporations. The committee figured on an increase in the normal rate on individuals from 2 to 5 per cent and on corporations to 6 per cent. The rest of the increase may be obtained by increasing the excess profits tax and by consumption taxes on sugar, tea, coffee and cocoa.

Under the program \$1,062,700,000 would be the total levy this year upon incomes. The present law yields \$300,000,000, and the pending bill originally was designated to increase this by \$532,700,000, and the \$230,000,000 additional it is now proposed to levy would raise it over the billion mark.

The senate committee will confine its work for the present to the current war tax bill and will leave to the house the task of raising the rest of the \$7,000,000 the administration believes it must have to prosecute the war this year.
