Known To The Nation As The Sensible Six

\$945 F. O. B. FACTORY.

Possesses important feature of design which are found also in those higher priced cars as embodying the very latest and best engineering practices. These superior features, which for two years have distinguished the Oakland Six as a car of unusually advanced design, and which are now employed in the latest models of many of the more costly cars, not to be found in their entirety, in any of the other cars in the Oakland price-class. As a result, the Oakland Sensible Six, in the estimation of the buying public, is raised above the plane of its price, and naturally is compared to and competes with cars of considerable higher price than its own.

Robbing Peter, Patrick and Percy to Pay Paul

Did it ever occur to you that when you buy at a "Clearance Sale" you unquestionably make a "saving," but those who bought during the season have been paying in advance for your saving?

It is obvious that making a sale of old merchandise is suicide. Much of the new stock is inferior to old, and costing much more.

Use plenty of salt with "Clearance Sale" advertising this year. Styles are not changing materially and the business man is not giving away staple merchandise at less than cost.
