To Thoughtless Men!

Don't the wife deserve modern tools for her work, too?

Many a man farmer, artisan or business man alike buys the most modern tools for his work and lets his wife go on working over a stove that was out of date thirty years ago.

It's not selfishness—it's thoughtlessness—and this appeal is to make you think!

A MONARCH Malleable Range in your kitchen would make a wonderful difference in your wife's house work. It would make the work hours fewer and pleasanter.

Drop in and see this most modern of Ranges or better yet send her and say, "go as far as you like."

Now Is the Best Time to Buy a Hudson Super-Six

Today's Prices are Based on Last Year's Material Costs. Present Markets Have Already Forced 51 Makers to Add \$100 to \$700 to Their Prices.

Former \$1200 and \$1400 cars now cost about as much as a Hudson Super-Six.

No changes warrant such an increase. They are practically the same as the cars which recently sold at \$200 to \$300 less than the Hudson Super-Six.

Cars in the \$2000 class and up have increased from \$350 to \$700. That removes them further from the Hudson Super-6 price.

Increased cost of material is responsible for the higher prices.

Hudson prices have not increased this year. Our materials were contracted for months ago. When present supplies are exhausted, then, too, must Hudsons cost more. Until then Hudson, because of its value is the lowest priced car on the market.

Here is an indication of how prices have been affected. Consider just one item.

The principal material in a fine automobile is steel. All steel is made from iron.

For 25 years before the Great War the average price of iron was a few cents over \$16 a ton. In December last it was \$30 a ton. It now is \$54 a ton.

Makers who bought materials this year must get more for their cars than for those built of materials bought last year.

Good Fortune for Hudson Buyers

Even when other cars sold at \$200 to \$300 less, Super-Six sales exceeded those of any two makes in the \$1200 to \$1400 class. Now that there is no such difference in price you can realize how much greater will be the demand for Hudsons. The present supply won't last long. Then Hudson, too, must cost more.

There can be no preference now that former cheaper cars cost as much as the Super-6.

Super-Six endurance makes it the preferred among fine cars. In ever revealing test it has proved endurance unequalled by any other car.

All Due to the Super-Six Motor

Hudson leadership is due to the Super-Six motor. No other motor is like it. It minimizes vibration. That increases power and lengthens motor life. Vibration is the most destructive force in a motor. All Hudson tests show how by minimizing vibration endurance is obtained. The Super-Six is the most powerful automobile motor of its size known.

L. H. PULS,

MURRAY, - - - - - NEBRASKA

We venture to say that our old friends, J. L. Young, residing up near Coleridge, Nebraska, is just about the happiest man in all northern Nebraska this week, rejoicing over the arrival of a fine new baby boy at their home last Friday. This is the first boy in the family and John has just cause for feeling happy. He can see a valuable assistant for his fine stock business in future years.

The ladies of the K. N. K., also a number of ladies from Murray were most royally entertained at the home of Mrs. Mark White, east of Murray, Wednesday afternoon of this week. The ladies of this society usually have a very interesting and profitable program for these meetings, and this one was fully up to the usual high standard of enjoyment and work for the society. They were treated to the very best in the White home.

The little friends of Eldorine Shrader gave her a very pleasant surprise party at the home of her grandparents, Mr. and Mrs. H. C. Long, on Tuesday of this week. The occasion was given as a farewell to Miss Eldorine, who will soon return to her home in Omaha, where she will attend school the coming winter. There were quite a number of her little friends present to take part in the merriment of the day. At the usual hour they were treated to an excellent luncheon.

May, the little six-year-old daughter of Mr. and Mrs. John VanHorn, met with a very painful and mys-

terious accident last Friday. The little lady was playing on the outside of the house with one hand resting on the side of the building, when, as she

explained it, something came whistling along and at the same instant an ugly gash was cut in her hand, that
