## Why Do You Strive for Quality Products?

### Why Not Raise Ordinary Livestock, Ordinary Grain or Ordinary Fruit?

It costs extra money to start and maintain a herd of blooded cattle, hogs or sheep.

It takes extra time and care to select quality seed corn as a basis for a quality crop.

It takes extra money, time and care to start and keep up a quality fruit orchard.

You could do away with this extra expense by being satisfied with just ordinary products. Why do you seek quality?

Here is the reason: You pin your faith to quality because you know that the extra expense entailed by the effort for quality is more than offset by the extra profits that quality products return.

Quality is profitable in what you raise to sell. It is just as profitable in what you buy to use.

We have at your service a stock of highest quality farm implements. There is nothing of the ordinary in these implements. Their quality has

been recognized for years throughout the world.

If you were fully satisfied with raising ordinary products, we might deal in ordinary implements. Quality in what we had to sell would not attract you. But knowing that you appreciate the worth of quality, we are here to serve you with quality goods. You will find the quality of our stock and the quality of our service, both profitable to you. And remember you can see before you buy.

Quality is profitable in what you raise to sell. It is just as profitable in what you buy to use.
