OPPORTUNITIES FOR EDUCATION AT WASHINGTON

Washington, Nov. 5.—To the young man or woman who seeks to obtain a college degree and a livelihood at the same time, no city in the country offers an opportunity more attractive than that to be found in the national capital. The several universities at Washington provide evening classes with hours arranged conveniently for Government employees, who ordinarily complete their day's work at half past four and all libraries, including the Library of Congress, are open at night.

For years thousands of young people have entered the civil service at Washington with the main idea of devoting three or four years to equipping themselves for a professional or scientific career while supporting themselves. Many of the young men live at fraternity houses, cooperatively conducted, thereby lessening the living expense and also securing a place where they can entertain their friends.

In addition to the university courses, the Young Men's Christian association and private schools conduct evening classes in technics, language, accountancy, stenography and typewriting, and the usual high school studies.

Notwithstanding the drafts for military service, practically all of the schools in Washington show an increased enrollment this year. This is due to the great influx incident to the war. Ten or twelve thousand new clerks and other employees have been appointed in the departments and his great civilian army is being added to daily. Stenographers and typewriters and mechanical draftsmen for the service generally, and what are known as schedule clerks, index and catalog clerks, and clerks qualified in statistics or accounting, as well as clerks qualified in business administration for the office of the Ordnance department of the Army are in demand.

The representatives of the Federal civil service commission at the post offices in all cities are receiving numerous inquiries from persons who wish to be at the seat of government at this time of big events and to have a part in the actual administration of the Government's great business. Women are finding in this office work an opportunity to "do their bit" in a very practical way.
