WILL PLANT 80 ACRE ORCHARD.

From Saturday's Daily. The State of Nebraska, through their state farm department have just concluded the purchase of an eighty acre tract of land just a short distance from Union, which it will be used as an orchard experiment farm, planting it in fruit trees for the purpose of testing not alone the varieties of fruits, but to test this portion of the state as to its adaptability, for the commercially growing of all kinds of fruits. The well known success which had been achieved only a few miles from the location purchased, Mr. Pollard had made a great success, and it is very probable that this place will prove as favorable for the growing and testing of trees, and fruits as that near Nehawka which is owned by

Mr. Pollard. Southeastern Nebraska is gaining a very enviable reputation and a place adapted to, especially growing of apples, and that of the choice varieties. 111 元
