ALLIES WANT MORE TO EAT; MUST HAVE IT

U. S. ASKED TO DOUBLE MEAT EXPORTS AND SEND OVER A LOT MORE WHEAT

HOOVER PLEADS FOR SAVING

Enforced Conservation in Cafes and Extension of Anti-Hoarding Rules—No Rationing.

Washington, Jan. 11.—Enforced food conservation in restaurants and extension of anti-hoarding regulations to make them apply to the household are included in the plans of the food administration for creating a larger export surplus of food for the allies.

This was revealed tonight in a statement by Food Administrator Hoover, setting forth that the allies are in need of an additional 75,000,000 to 90,000,000 bushels of wheat, and that they have asked America to double meat exports. Only further saving, Mr. Hoover declared, can be productive of the desired end. There is no need for rationing in America in Mr. Hoover's opinion, and with the supplementary regulations there will be no shortages.

Must Save More.

"It is true that the allies need from 75,000,000 to 90,000,000 bushels of American wheat," says the statement. "It is also true we have already exported the theoretical surplus of last harvest over our normal consumption. The American people have saved a considerable amount estimated from 25,000,000 to 50,000,000 bushels during the past five months and we are exporting this saving.

"We cannot and will not export more than our savings, for our own people must also be fed. The allies have reduced the bread ration to their people sharply the last few days and if this lowered ration is to be maintained, we must save more than hitherto.

"Every grain of wheat and every ounce of flour and bread saved now is exactly that amount supplied to one man, woman or child from the allies.

Will Soon Announce Progress.

"We are asking the American people to further reduce their consumption of wheat products and use other foodstuffs instead, for the allies must also have some wheat as well as ourselves. It is one of the vital issues in winning the war that we must maintain the health and strength and morale of their men, women and children over this winter.

"Our forty-eight state food administrators have been in session in Washington the last few days devising with us a further program of saving which we will announce in a few days, in which we count with confidence on public support.

"The allies are also asking us if we can double our meat and pork production exports, as they must in England, France and Italy further reduce their meat and fat ration unless we can increase exports. We have replied that we will ask our people to save more, for we can only export our savings.

"There need be no fear that our and if, as a result of misapprehen-

sion, anyone should attempt the purchase of foodstuffs for hoarding it will be robbing the allies of just that amount and is a violation of the food law that will be followed up sharply. We have ruled that the holding of more than thirty days' supply by dealers, manufacturers, wholesalers and retailers constitutes hoarding and the purchase of more than usual amounts by consumers will likewise be so construed.

No Need for Rationing.
"We are going to ask millions of devoted women who support the food administration to see that our new proposals are carried out on every side. In this we are taking a fine unique among nations and with the confidence that in them we have a power for enforcement and through our press of the creation of public opinion greater than among any people on earth.

"Legislation is being considered by Mr. Lever and Senator Pomerene for presentation to congress for some further extension of the president's powers to enforce conservation in manufacturing trades and in public eating places. Although the majority have co-operated willingly and effectively there is a minority which patriotic appeals do not seem to reach.
