Thrift Stamps--

The war is costing the United States \$1,000,000 an hour. To offset this steady and tremendous drain upon the nation's cash resources, there must be a corresponding stream of dollars flowing into the national treasury.

Thrift stamps and war savings stamps offer the people an opportunity to deposit their daily, weekly or monthly savings with the government.

In return the government will repay the principal with 4 per cent interest, compounded quarterly. As an example of how the investor's money will grow, sixteen war savings stamps, costing 25 cents each, or \$4.00 in all, with 12 cents added, will entitle the depositor to \$5.00 on January 1, 1923.

As an investment, safety considered, there is nothing better on the market today. All the resources of the richest government on earth are behind the stamps.

The public sale held at the home of Mrs. Joe Sans, east of Murray, on Wednesday of last week, was quite well attended, and the good buyers of the community were sure on deck. The property sold well and fast. It was good stuff and found ready bidders. When you think that the Murray Hardware and Implement company are not doing business in the farming implement line, you are badly mistaken. This line of goods has been made a feature with this firm ever since they embarked in the hardware business a few years ago, and they have been growing very rapidly ever since. They have increased the business from a few hundred dollars per year up into the thousands, and are still growing and looking for more, and the best of all is they are getting it. This week they are unloading two cars of farm implements and wagons, and have more on the way to take care of their spring orders. We are glad to see this, for an enterprising and progressive firm like this is surely entitled to success. They are entitled to the business of this community for the simple reason that they carry the goods that are of a standard manufacture, and meet the prices of competitors and on this basis every man is entitled to the business of his community. They look after their trade in a very courteous manner and exert every effort to please them all. On what other basis are successful business houses established?
