SOLDIERS TOO BUSY TO WRITE.

With the American Army in France, Feb. 21.—If letters from your friend, your son, your husband, your sweetheart, your brother—as the case may be—do not come as often from France as they should it is because that particular soldier is so busy he actually has not the time to write. Officers in various units whose duty is to censor letters written by the rank and file say that the quantity of mail that comes to them is the best barometer of how much work the command is doing.

"If the men are working hard," said one censor the other day, "not more than five letters a day will come thru me and they will all be short. If there is just a little work to be done the number of letters probably will be about twenty-five. And if the command happens to be doing nothing at all—say it is resting after a period in the line—I may get as many as two hundred letters in a day to censor."

Miss Nettie Moore and mother departed this afternoon for Omaha, where they are visiting with friends.

IOWA Cream Separator

equipped with the Patented "Curved Disc" Bowl, will soon pay for itself with the butter fat which it saves and which would be lost in the use of the ordinary straight disc Separator. The Curved Disc Bowl of the "IOWA" gets all the butter fat, whether the milk is hot chilled or cold. Butter fat selling at 50 cents a pound—\$1,000 per ton—is the most valuable product on the farm. You cannot afford to lose one single drop of butter fat. Increase your cream check every week by using the "IOWA" equipped with the Curved Disc Bowl—the only Cream Separator that gets the last particles of butter fat.
