Sweaters for Next Winter

This is an unusual season. The idea now is to get the goods in the house if you want to be sure of them at all. We contracted 6 months ago for next winters sweaters. Among them was a sample line from one of the biggest St. Louis wholesalers. These numbers have all been closed out and the samples have been shipped to us. They are here now and we are going to give you a chance to buy them right now at practically wholesale prices. They are mostly men's in all grades and shades. Rope Stitch, Shakerweave and Cardigan weave. Some with collars—some without.

SWEATERS

are going to be high and scarce next Fall. You can buy these samples very cheap and besides having it when you want it next Fall you will be surprised how useful it will be between now and then for riding, picnics, etc.

The World's Most Accurate Corn Planter

And the Remarkable Tests that PROVE IT!

Planting Accuracy

IF YOU could plant 20 more perfect hills of corn out of every 100 than you now are planting—it would add hundreds of dollars to your bank deposits this year. Yes sir, it would mean 7 more bushels per acre! It would mean \$350.00 more profit for every 40 acres you planted!

The famous J. I. Case Corn Planter will actually do this. We want to show you how. In fact, we want to prove to you that this is true.

Come into our store any day and we shall be glad to demonstrate this machine. We want to show

you the polished beveled plates, the two cut-offs, the drive from the main axle, and a host of other features. But best of all we want you to see right here a proof of accuracy in planting that will surprise you—it will do the same thing on your own farm.
