One story is of the christening of a new plane the "Lady Florence," which has a Liberty Motor, and the description is very interesting. The paper also contains base ball scores, there being a number of clubs and three leagues, they being, National League, American League and Federal league, with twelve teams each, with a game every day in the week from each. He is a graduate of applied engineering, and has had much experience in that line over much of the country, having superintended construction on a large scale in Los Angeles, San Francisco, and other points, then returning to Omaha he was thus engaged there. Being a mathematician of unusual ability he has been giving instruction in the matter of range getting over obstacles, such as unevenness of the ground like over a ridge of and, where it is desired to catch the object on the other side. Mr. Murty made an excellent representative, and we do not see how those who have the good of the country and its interests at heart could do better than to return him to the law making body. Just before his filing was also the filing of L. G. Todd who files for float representative, and which position he served for 2 years.
