FINE WHEAT CROPS.

Threshing in this community for the past few days has been consuming all the time of the farmers. The small grain crop is going beyond the expectations of most of the farmers in this locality. We have been informed that Dave Eaton had a piece of wheat on the bottom land east of Union that made an average of 40 bushels to the acre, and the quality is exceptionally good. Other pieces are running as low as eighteen, and a very few may be lower. It has been estimated that the average will be in keeping with other years. The farmers are also saving every grain that is possible this season also, as they have prepared tight boxes for their racks and have spread canvass under all the machines, thus saving every kernel that may drop from the straw or machine. It has been estimated by the government that a saving of 3,000,000 bushels can be made over the entire country.

**Our Service**  
And What It Means to You

We Have a Joint Interest in This Community  
And We Wish to Join With You in Every Way to Promote the Community's Interests.

In a sense, this community is like a farm—it pays according to the way in which it is treated.

The successful farmer co-operates with his farm.

Knowing that certain soil elements are necessary to healthy crop growth, he sees to it that these elements are maintained.

The same principle holds good in community development. Our community is composed of two closely related elements—town and country.

They are both essential to healthy community growth. Neglect or mistreatment of either of them by the other affects both—it injures the whole community.

Accomplishing this is simply a matter of sincere co-operation among all of us in this community. Our idea of our own part to play for community good in a business way is— To sell only such implements as have the quality to give high-grade results in the field. To consider good performance by our implements as a part of our obligation. To sell every implement at a fair price. To practice the square deal towards each and every customer. On this basis we invite the co-operation of every farmer in this community.
