FUNERAL OF FORMER PLATTS-  
MOUTH LADY AT FRANKLIN,  
NEBRASKA LAST WEEK.

From Tuesday's Daily.  
The following account from the Franklin, (Neb.) paper, tells of the death of Mrs. Allie Florence Craig Haines, sister of Mrs. George E. Perry, of this city.

Allie Florence Craig was born at Plattsmouth, Nebraska, April 2, 1862, and died at her home in Franklin, July 4, 1918, aged 56 years, 3 months, and 2 days. She was married to Isaac M. Haines January 27, 1886, at Indianola, Nebraska. To this union were born four children, two sons and two daughters.

Mr. and Mrs. Haines lived on their farm east of Franklin for twenty-five years and since then have lived in Franklin.

She was a faithful member of the Congregational church of Franklin, with which she united December 25, 1892.

She was a tender, true and loving wife and mother, always sacrificing her own comfort for others. If there was an unspoken motto by which her life was guided it would be best expressed in those words, thoughtful of others, forgetful of self, and day by day living the Christ-like life, walking in His footsteps by word and deed. Our feeling for her can be expressed in no better words than the following which were written by her in memory of her own mother:

As we, her children, deeply mourn  
The loss of our loving mother dear,  
A ray of hope that is heaven born  
By angel voices is wafted here.  
And this is the thought it brings to us

As we place the casket beneath  
The sod,  
That though the body moulders here  
We know her spirit now dwells  
With God.

Besides her husband and children she is survived by three sisters, Mrs. E. D. Haines, Franklin, Nebraska; Mrs. John Adams, Eagle, Nebraska; and Mrs. G. E. Perry, Plattsmouth, Nebraska, and a brother, J. M. Craig, Burwell, Nebraska.

Funeral services were held at the Congregational church Friday afternoon at three o'clock, with Rev. J. L. Read officiating. Burial was made in Greenwood cemetery.

### GOOD WHEAT IN KANSAS.

From Tuesday's Daily.  
Haywood Ellege and N. W. Christinger the latter of Omaha, returned last evening from Maxville, Kansas, where they have been harvesting for some weeks past. They were pleased with the crops, the treatment and the conditions there. On one particular farm where they were employed, at \$5.00 for ten hours work, they helped harvest 320 acres of wheat which averaged 30 bushels per acre or approximately 10,000 bushels from the field, and then the prevailing prices would make over \$20,000 which is pretty good for one farm it looks to us.

### GETTING SOME YIELD OF WHEAT

From Monday's Daily.  
The threshing returns from one piece of wheat which Eddie Todd raised on the Platte bottom, was for the twelve acre piece 596 bushels, or 49 1/2 bushels per acre. This piece of ground which is an excellent one, has raised wheat before which is record breaking. He has other good wheat which produced something about forty-one bushels, but this was the banner piece. Many other pieces have produced good yields here this year. The land should be pretty valuable which shows return of over one hundred dollars per acre.

### BUREAU NOTES

#### Sweet Clover Grows in Favor.

Sweet clover in sheep and cattle pasture is growing in favor at the College of Agriculture of the University of Nebraska. It has been demonstrated this summer that sweet clover will stand drouth much better than blue grass. It can be pastured at all times by sheep and cattle. While it is usually sowed in the spring, it would probably get a good start if not sowed until late in the summer, especially with favorable weather. About fifteen pounds to the acre is the right amount of seed.

Boys and girls that are in the Pig

Club please send me your name, address and precinct so I can arrange for the precinct prizes.

Smut Treatment. As the spring wheat should smut to a serious amount all winter wheat should be treated. I would be glad to come to your farm and hold a demonstration on treating wheat for smut.

A Nehawka farmer reports that by using canvas at the machine, tight bottomed racks and raking the ground, 60 bushels of wheat was saved which sold for \$2.05 per bushel bringing the sum of \$123.00 which more than paid the threshing bill. The wheat averaged 18 bushels testing 64 pounds.

When they had arrived at Omaha, Mr. Gering secured a large auto, and the Plattsmouth boys were taken into the car and show the sights of Omaha visiting the Omaha Ballooning school, where they saw some ten balloons in practice of signaling.
