ST. MIHEL SALIENT FALLS; 13,300 PRISONERS TAKEN CENTER BUTTRESS OF GERMAN FRONT NOW THREATENED

Isolation of Fortress of Metz by Great Encircling Movement Expected by Washington Observes as Sequel to Elimination of St. Mihiel Salient; French Armies at Verdun Released.

Washington, Sept. 13.—The number of prisoners taken by the Americans in flattening out the St. Mihiel salient now numbers 13,300, General Pershing reported in his communiqué for today, received late tonight at the War department.

The text of the statement follows: "Headquarters American Expeditionary Forces, Sept. 13.—Section A: In the St. Mihiel sector we have achieved further successes. The junction of our troops advancing from the south of the sector with those advancing from the west has given us possession of the whole salient to points 12 miles northeast of St. Mihiel and has resulted in the capture of many prisoners.

"Forced back by our steady advance, the enemy is retiring and destroying large quantities of material as he goes. The number of prisoners counted has risen to 13,300. Our line now includes Herbeville, Thillet, Hattonville, St. Benoit Xammes-Blaucourt and Vieville."

Washington, Sept. 13.—Complete elimination of the St. Mihiel salient

by General Pershing's army and co-operating French forces, many army officials here believe, is only the entering wedge of operations of far larger scope.

Official dispatches were still delayed and the full scope of the victory won by the Americans in their first independent action could not be gauged. It was regarded as probable, however, that General Pershing's men still were pressing forward to get in touch with the new line the enemy hopes to hold.

Until definite word comes as to the line across the mouth of the destroyed salient which the Americans now hold, officers here will be unable to form opinions as to the most probable course future operations in this theater will take. There is a strong opinion, however, that the quick evacuation of the St. Mihiel salient will be made the cornerstone of a great encircling movement aimed at isolating the German fortress of Metz, the center buttress of the whole German front from the North sea to the Swiss border.

general operations were hampered when someone in an American uniform shouted that further resistance was not necessary and that therefore the troops should surrender. This was probably a German in some captured American uniform. The unit was advised to kill anyone suggesting surrender and all American troops are following the same plan. This means it will go hard with any German propagandist attempting to injure the morale of our soldiers in battle. German prisoners taken in Alsace report the Kaiser's soldiers are eagerly reading American propaganda which is thrown into their trenches.
