CASUALTY LIST TO BE COMPLETE AT END OF WEEK

GENERAL PERSHING ADVISES WAR DEPARTMENT THAT BUT 40,440 CASES REMAIN TO BE REPORTED.

Washington, Dec. 18.—General Pershing cabled the War department today that practically complete reports of death in action among the expeditionary forces should reach the department by December 29, and of severely wounded by December 27.

General Pershing said that the number of unreported casualties in process of verification at the central records office of the expeditionary forces December 14, was 40,440. They were divided as follows: Killed in action, 399; died of wounds, 275; died of disease, 353; accidentally killed, 51; severely wounded in action, 39,271. These included all "suspense cases under investigation," the general said.

Wildcat Division Hit Hard. Total casualties to November 23, in the Thirtieth (Wildcat) divisions (North Carolina, South Carolina and Tennessee national guard), were given as 7,623. The casualties were classified as follows: Killed in action, 1,169; died of wounds, 283; died of disease, 15; died of other causes, 5; severely wounded, 1,181; wounded, degree undetermined, 595; slightly wounded, 3,973; missing or captured, 193.

Few Duplications. General Pershing reported that the number of duplicated casualties in the central records office since November 27 would not operate to reduce the total for the entire expeditionary forces given in his summary of that date, as additional

casualties reported more than offset the duplicates.

Fearing for Thirtieth. The report today from the American commander was in reply to specific questions cabled by the War department. In asking regarding the casualties in the Thirtieth division, the department said there had been "much apprehension" here about the losses of this unit which helped the British army break the famous Hindenburg line.

Advertisement for Dodge Brothers cars. Text: 'Good Will Given a New Impetus'. A statement of Dodge Brothers war activities is due the owners of their cars. Dodge Brothers refrained, during the progress of the war, from any reference to the performance of the car in Government service. It seems proper now, however, to disclose the facts, because they are unusual facts—intensifying that good will which owners of Dodge Brothers Cars have always manifested. Dodge Brothers car was the only one of its class approved and adopted by the War Department. In a separate Ordnance Works, built especially for the purpose, costing millions of dollars and employing thousands of their skilled motor workmen, Dodge Brothers undertook an important duty designated by the War Department. Without the aid of their great motor organization, Dodge Brothers could not have fulfilled the heavy obligation which they were asked to assume by the Ordnance Department. The other service required of Dodge Brothers motor works, by the Government, was to continue to furnish their cars as they were needed. They were furnished, not in hundreds, but in thousands—both for the training camps here, and for service in Belgium, France and Italy. The record of those thousands of camp and army cars is one in which any owner may feel the utmost pride and satisfaction. Their performance justified the compliment implied in their selection by the Government. The great works in which nearly three hundred thousand of their cars have been produced in the past four years furnished a vast store-house of human energy and equipment for the ordnance work. Naturally, it will take time to adjust the motor works to its full accustomed activity. Gradually Dodge Brothers will resume the grateful task of continuing to deserve the good will of America—and indeed of the whole world. Dodge Brothers consider good will their most valuable possession. They will never knowingly do anything to lessen it. JOHN F. GORDER, PLATTSMOUTH, NEBRASKA
