PASSING OF MRS. JOHN W. LEWIS

Obituary of Loving Wife and Mother Who Has Answered the Call of Her Master.

From Saturday's Daily.
Mary Irene Barker was born October 28, 1895, at Plattsmouth, Nebraska. In her early childhood she devotedly responded to the voice of her Lord and was baptized at the age of fourteen years, uniting with the Christian church at Plattsmouth. She ever maintained a relation of faithful loyalty to the church until called to the fellowship of the Church triumphant.

On March 20, 1907, she was united in marriage to John Wesley Lewis, at Plattsmouth. For several years this place was their home, but later they removed to Tekamah, Nebraska and three years ago to New Raymer, Colorado. Into this happy home were born three lovely daughters, Thelma, Elsa Marie and Violet.
Her faithful and devoted ministrations as wife and mother came to an end on Sunday, March 9, 1919, at her home near New Raymer. Besides the stricken husband and the motherless children, there remain to mourn her among the immediate family, her father and mother, Mr. and Mrs. W. H. Barker, and six brothers and sisters, Ray, Wesley, Floyd, Pearl, Blanche and Nettie, all of New Raymer, Colorado.
Following a brief service Tuesday morning at the home of the parents

of the departed, in New Raymer, the body was brought to Plattsmouth, where the funeral was held on Wednesday from the church with which the deceased united when a child.

The place she has left vacant can never be filled, but by her life spent in self-forgetting service of others, she has bequeathed the priceless heritage of a beautiful memory.

Sometimes long after the sun has gone,
As we watch at the close of the day;
The sky is bright with a rosy light,
Mid the evening shadows gray.

Long after a beautiful life has gone
To that fairer world on high;
Our lives are bright with its lingering light,
For a true life cannot die.
—BARNETT.

CARD OF THANKS

We desire to express our thanks to the friends who were so kind in their ministrations and sympathy at the time of the death and burial of our beloved wife and daughter, Mrs. John Lewis, and for the floral offerings, and to those who did the singing.—John Lewis and Family; W. H. Barker and Family.

MAKES APPLICATION FOR SUPERINTENDENT

From Saturday's Daily.
L. W. Wessell of Giltner, was in the city yesterday, coming to interview the members of the board of education, and to leave with them his application for the position of superintendent of the city schools for next year. Mr. Wessell is the superintendent of the schools of Giltner, and for the years of 1916 and 1917, was serving at that place on a salary of \$1,000.00, and the present year shows that he is receiving a salary of \$1,750.00 which is a pretty substantial increase, denoting that the people of that place were willing to make some concessions to keep him in their schools.

MRS. A. F. MOORE GAINING NOW.

From Friday's Daily.
This morning, A. F. Moore departed for Omaha, accompanied by his little daughter, Miss Vivian Fern Moore, they going up to visit the wife and mother, Mrs. A. F. Moore, who is at the Methodist hospital, where several days ago she underwent an operation for appendicitis and other complications, and it is reported is getting along as well as could be expected, though still very weak. Little Vivian Fern had not been able to see her mother since the operation until today, but as Mrs. Moore is getting along so nicely it was thought well for the little daughter to visit her mother.

ARRIVED HOME FROM THE WEST

From Saturday's Daily.
Mrs. Frank J. Morgan and her mother, Mrs. A. W. Scott, who have been in the west for the past winter, having visited at many places of interest and with many friends, returned home this morning. Mrs. Morgan and mother left last fall and have spent the winter in a mild climate, although they did not escape the usual rigorous winter for this section, but a mere feeble attempt of the weather man to produce a bit of cold weather.

HAVE NEED OF MORE MACHINISTS HERE NOW

BUSINESS AT WESTERN MACHINE SHOP FAR ABOVE THE CAPACITY

ALSO HAMPERED FOR ROOM

Alfalfa Mill Soon to be Established—Only Obstacle Now is Title to Site for Building.

From Friday's Daily.
A representative of the Journal was a visitor yesterday at the machine shops of the Western Machine and Foundry company, and found the wheels turning and the workmen all busily engaged.

With the limitations placed on material during the war period those shops not engaged in turning out government contract stuff found it difficult to get enough material to keep going even on a rather limited scale. This was the condition the local plant faced and although they had innumerable orders for early delivery on their books they could not get enough material to operate the plant to the limit of its capacity and consequently numerous of the employees of the institution resigned to accept positions in plants turning out war work, where they were not hampered by lack of material, or, as was the case in several instances, to enter the fighting forces of Uncle Sam.

With the ending of hostilities the matter of getting material is clearing up quite rapidly and institutions of this character are getting back on a peace-time footing. Then, too, many of the boys in the service are returning to their former positions of civil life activity.

At the present time the local shop has orders on its books for early delivery of upwards of \$200,000 worth of work, but with a limited supply of help staring them in the face, the problem is nearly as vexing as that caused by the recent shortage of material. Right now ten more machinists could be used to good advantage, and were it not for the lack of room, fifty could be employed equally as profitably in the turning out of this contract work.

Among the larger orders booked, is one for twelve cone machines with a capacity of thousands of ice cream cones per hour. When completed, these are to go all over the country. Besides this they have advance orders for several thousand of the Ford Safety Crank devices and numerous other of the smaller articles which they manufacture.

A Very Valuable Invention

The newest invention to be manufactured in this institution is a machine which shreds, cuts, grinds and mixes forage plants at one operation, while another compresses the mixture into a very small space, making it more easily handled. Those who have had experience with the grinding of corn fodder find that the ear of corn itself contains but about 22 per cent of the nutriment of the plant, the remaining 47 per cent constituting the stalk and leaves. It has long been the practice to gather the part of the crop representing the 53 per cent, and endeavor to save as much as possible of the remaining 47 per cent by turning the stock into the field to pasture from it. But such procedure, as every farmer and stockman knows, is wasteful. Careful research is said to have proven that only 30 per cent of the nutriment of the stalks and leaves is preserved when fed in this manner, the balance going to waste. Thus the farmer suffers a loss of approximately one-third of the nutriment of his corn crops under the procedure described above. In order to circumvent this loss, Mr. Sharpe has produced a machine that will take care of the entire crop and thus save what otherwise would be lost.

The success in the invention and perfection of the machine to grind and put this product in shape for the market has been beyond even the expectation of the inventor.
By using a combination of corn fodder and alfalfa a product can be obtained that contains almost as much food nutriment as the original alfalfa and at a cost of about two-thirds as much at the present prices of the two commodities. Alfalfa costs around \$30 a ton and the new product would cost about \$20. Alfalfa has a nutriment strength of 51.6, while the mixture has a feeding strength of 49.7, thus bringing it up to within two points, while the cost is reduced some 33 1/2 per cent. This fact alone proves that the in-

vention is worth while, but the fact remains that the operation of a mill for the commercial preservation of the fodder of a community might be much more economical than the old method of conservation.

Will Construct a Mill

For many years there have been in operation various alfalfa mills which convert the alfalfa into meal and when it has been mixed with molasses, press it into large cakes of palatable and nourishing food. In such institutions no increased nutriment is effected by the change—the object being merely to get the product into a form which can be more easily handled than the alfalfa itself.

Now this new invention which is the output of the Sharp factories is intended not only to use the fodder for mixing with the alfalfa, but to grind the resultant mixture into a similar meal and conserve it through much the same form of treatment. Under the most approved methods of fodder conservation now in use it can only be stored in a silo on the farm and it so occurs that its transportation from one place to another is impracticable and it must be fed as it is removed from the silo.

While the invention Mr. Sharpe has perfected the fodder can be placed in condition to allow of its shipment at a minimum of expense.

It is the plan to construct a mill of this kind in Plattsmouth as soon as the title to the site upon which it is proposed to erect the mill has been transferred to those interested in its construction. There is on hand at the present time some \$40,000.00, which they hope to utilize in the construction and operation of the mill. When the mill shall have demonstrated the practicability of the new Sharpe fodder-conservation invention other mills will be erected both for demonstrative and commercial purposes as well.

The Western Machine shop is also producing a grinder, which will be mounted upon a carriage for transportation from one part of the farm to another or to different farms, and the use of this machine will prove of great benefit to the farming community, as it will save this 30 per cent of the corn crop which is now being lost due to inadequate methods of handling.

Has Had Stomach Trouble for Seven Years.

Theodore Sanford of Fenmore, Mich., has had stomach trouble for seven years and could not eat vegetables or fruit without pain in the stomach and restless nights. By taking Chamberlain's Tablets he is now able to eat vegetables or fruit without causing pain or sleeplessness. If troubled with indigestion or constipation give these tablets a trial. They are certain to prove beneficial.

TRUTH ABOUT MARRIED LIFE IN NEW YORK

A THEME OF AGGRAVATING APPEAL TO HUMAN INTEREST IN PICTURES.

WHAT IS VIRTUE IN A WIFE?

See Dangers of Present Day Living Portrayed at Parmele Tuesday and Wednesday.

First published serially in the Cosmopolitan Magazine as the big story of the year and later published in book form, "Virtuous Wives" has been read by countless people over the United States in the past year. And in the cities it has been seen in moving pictures by equally large numbers since its first appearance a couple of months ago. Now it is coming to the Parmele theatre for a limited two-day engagement Tuesday and Wednesday nights of this week, where it will be seen by local movie fans who are more or less familiar with the story. The dangers of our present day mode of living are truthfully portrayed in the screen version of this popular story from the pen of Owen Johnson. The following sketch gives briefly

THE SCREEN STORY

Mr. and Mrs. Andrew Forrester, blissfully happy in the first few weeks of their married life, comfortably settled in a "small" New York apartment of fourteen rooms and three baths, made possible by his income of \$25,000 a year, are devoted in their mutual admiration of each other. Andrew is deeply in love with his wife for her beauty, her refinement, grace and breeding. Amy, fresh from innumerable social conquests as the reigning debutante of the season, finds in Andrew's strength of character, business acumen and his wholesome affection for her, a refreshing contrast to the men of her own set.

Maurice Delabarre, steel magnate with world-wide interests, bristles with polished indignation when Andrew refuses his offer of \$50,000 a year for five years and a stock bonus which would make him a millionaire, to go to Colorado and develop one of his holdings. Determined to make Andrew's remarkable executive ability an asset to himself, Delabarre invites the young couple to his country estate.

Their visit succeeds in greatly impressing Andrew Forrester with Amy's enhanced beauty and charm against a background of lavish elegance. Irma Delabarre, a social idol and a model mistress of conventional flirtations and diverting "affairs," offers, at her husband's suggestion, to entertain Amy while Andrew is absent in the West—here to win the fortune which is to give his young wife the same luxuries and social latitude that Irma enjoys. Forrester accepts Delabarre's offer

and asks Amy to play for both of them while he is away.

Monte Bracken, social waster of the moneyed, intelligent type, falls in love with Amy, to the surprise of Irma Delabarre, who secretly cherishes an affection for him above all other of her conventional admirers. To thwart Bracken's effort to win Amy from her husband, Irma writes a note of warning to Andrew, who returns at once to New York. Amy refuses his demand that she pack and go West with him immediately. It is the eve of her first big social triumph—a pre-historic ball.

Andrew quickly grasps the extent of the affair between Amy and Bracken, and unconsciously becomes Irma's victim as her reprisal against Amy for winning Bracken from her. Andrew thwarts Irma's effort to wreck his pride by remaining loyal to Amy, despite the insult of her affinity with Bracken. He accuses Bracken of being a cad and has his eyes opened by the social parasite to the fact that it is his own conduct toward his wife which has led Amy to the danger point.

Andrew gives Amy an hour in which to make her choice. She seeks the woods for solitude to hide her own heartache caused by Andrew's misinterpretation of her intentions with Bracken. There she rises to a situation fraught with great personal danger to herself and which leads to a revolution of conduct in the Delabarre household, and her own triumph over an obstacle of such proportions that it seemed certain to wreck the happiness of herself, her

husband and their associates.

In the successful outcome of her bravery and forgetfulness of self she provides a modern definition of the meaning of virtuous wives, and establishes a new feminine standard which brings happiness out of misery and moral danger.

EVER HAVE IT?

If You Have, the Statement of This Plattsmouth Citizen Will Interest You.

Ever have a "low-down" pain in the back?

In the "small," right over the hips?

That's the home of backache.

If it's caused by weak kidneys.

Use Doan's Kidney Pills.

Plattsmouth people testify to their worth. Read a case of it:

Mrs. Harry Kuhney, Eighth & Pearl Sts., Plattsmouth, says: "I couldn't say anything but good words for Doan's Kidney Pills for I know from personal experience that they are all that is claimed for them. I use Doan's when my back aches and my kidneys are not acting as they should and they never fail to give quick relief. We use Doan's Kidney Pills in our home when necessary for kidney trouble and they always give good results."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Kuhney had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.
