

## Expanding to Meet Public Needs

THE packer is a purveyor of foods. Largely dependent on him are the producer, the retailer and the consumer. The farmer looks to the large packing concern to provide outlets for what he raises. The housewife relies upon the packer for an important part of her daily food supply. Retailers expect prompt service and regular deliveries. Thousands of workmen are given gainful employment.

Of all industrial undertakings none is so closely allied to the comfort and security of the nation.

To meet these responsibilities successfully makes large scale operation imperative. For, in order to buy from the grower whenever he is ready to sell, Armour must have a national market to distribute foods everywhere. And conversely, to make food supplies certain, Armour must be able to buy in many producing centers.

Serving both producers and consumers, it is evident that such a business must be conducted fairly and beneficially to all. In no other way can its existence be justified. In no other way could it have thrived.

But to carry out its uses fully, the responsibilities of the business must be met by the responsibilities of those it serves. In its own interests the public must give big business the opportunity to per-

form the service which is very properly expected of it.

With a multitude of problems to be solved in national collecting and distributing, a complex though smoothly working system has been evolved in the Armour organization through the course of years. Each part dovetails in its work with the rest. All are dependent upon and inter-related with the others.

Food plants would be unable to give stock-growers outlets without the branch houses which are continually competing for trade. And neither the producing plants nor the distributing branches could operate on an efficient and economical basis without the modern refrigerator cars directed under a single management which controls their movements.

In short, the Armour system is the outgrowth of national needs—a system that can give maximum service only as a whole—and that dismembered, would fail to live up to the requirements which the country and city public today demands.

### NEW MEAT MARKET OPENED YESTERDAY

B. J. Halstead, Popular Meat Cutter in Charge of the Union Market on Sixth St.

From Thursday's Daily.

Yesterday the new meat market which is being inaugurated in the building formerly occupied by the Peoples grocery store on South Sixth street, opened its doors for business. The new market is being conducted by B. J. Halstead, an efficient and popular meat cutter and good salesman as well, which gives ample assurance that the place will be operated in first class shape. The new market was enjoying a good business during the afternoon and evening. Mr. Halstead has engaged Michael Glass, who has had much experience in the meat business, being located for a number of years at Comstock, to assist him in conducting the business. He has an excellent location, and with his well known ability at looking after trade and endeavoring to please the public, we are certain this new business place in our city will prove a prosperous venture.
