**NATIONAL ASSEMBLY APPLAUDS ACT**

**TREATY CALLED BY CHANCELLOR 'MURDEROUS DOCUMENT' WHICH WOULD ENSLAVE PEOPLE OF GERMANY.**

Paris, May 13.—The German delegation announces the dispatch of a fifth note which probably will reach the French foreign office tonight and will be delivered to the council of four tomorrow morning. Berlin, May 13.—The declaration by Chancellor Scheidemann in the national assembly Monday that the peace terms were "unacceptable" brought the members of the assembly, the spectators and those in the press gallery to their feet in a hurricane of cheers and applause. The chancellor reached the climax of his statement on the peace terms 10 minutes after he began. The chancellor paused in his address and then thundered out the words which announced the German government's rejection of the Versailles conditions.

"This treaty," he said, "is in the view of the imperial government unacceptable, so unacceptable I am unable to believe that this earth could bear such a document without a cry issuing from millions and millions of throats in all lands, without distinction of party. Away with this murderous scheme!"

With the exception of the independent socialists, led by Hugo Haase, all factions in the assembly arose and cheered vociferously.

**Realize Gravity of Hour.**

"And I see among you the representatives of all the German races and lands, the chosen representatives of the Rhineland, the Sarre, east Prussia, west Prussia, Posen, Silesia, Danzig and Memel, together with the deputies of the unmenaced regions. I see the deputies of the menaced provinces who, if the will of our enemies become law, are to meet for the last time as Germans amongst Germans.

"To keep our nation alive—that and nothing else—is our duty. We are pursuing no nationalistic dreams. No questions of prestige and no thirst for power have a part in our deliberations. Bare life is what we must have for our land and nation today while every one feels a throttling hand at his throat.

"Let me speak without tactical considerations. The thing which is at the basis of our discussion is this thick volume in which 100 sentences begin 'Germany renounces.' This dreadful and murderous volume by which confession of our unworthiness, our consent to pitiless disruption, our agreement to helotry and slavery are to be extorted—this book must not become the future code of law."

**Land a Prison Camp.**

"Sixty millions are behind the barbed wire and the prison bars—sixty millions that labor for whom the enemy makes their own land a prison camp. Should the peace conditions be accepted Germany no longer could call anything her own which lies outside these narrow bounds. Germany has ceased to exist abroad, but as if that were not sufficient, her cables have been taken from her and her wireless stations can send only commercial telegrams and then only under control of the allies. This would separate us from the outer world, for what business can be done under the control of competitors need not to be described.

"But this is far from enough. The council therefore determines treaties between enemy countries to be null and void except such treaties whose execution is in favor of a government of the allied powers.

"What does President Wilson so aptly say? That the first principle of peace itself is equality, equal participation in common benefits."

Herr Scheidemann then argued that this principle had been abrogated in the peace terms. "Conditions Unacceptable." "That is the jail picture in its external aspects; without ships because the mercantile fleet passes into entente hands, without cables, without colonies, without foreign settlements, without reciprocity and legal protection, yes, and even without the right to co-operate in fixing the prices for the goods and articles which we have to deliver as tribute.

"I ask you what honest man will say that Germany can accept such conditions. At the same time we shall have to bestir ourselves to the performance forced labor for the benefit of the entire world, our foreign trade, the sole source of our welfare, is destroyed and our home trade is rendered impossible.
