### TO CLOSE DINING ROOM ON SUNDAYS IN FUTURE

From Monday's Daily. Elsewhere in this issue of the Journal appears an ad calling attention of the public to the fact that the dining room at the Wagner will be closed Sundays in the future. Mr. Wagner's commercial trade is good throughout the week but drops off Saturday and very few traveling men spend Sunday in Plattsmouth, preferring to run into Omaha, only a mere twenty miles away. Accordingly the patronage of Plattsmouth people in large numbers is necessary to operate the dining room without a loss Sunday and while it has been found that the number of local diners is large some weeks on other occasions it drops very low, and food

preparation for uncertain numbers is also expensive when it is not eaten. This coupled with the shortage of help who are willing to work on Sunday, has caused Landlord Wagner to announce the closing of his dining room on Sundays.

### DEPART THIS MORNING TO THE PHOTOGRAPHERS ANNUAL CONVENTION

From Monday's Daily. Mr. and Mrs. Christ, who have so successfully conducted the local photograph studio for several months past, departed this morning for Kansas City, Mo., where they will attend the Photographer's Annual Convention, being held in that city this week. Mr. and Mrs. Christ have made a splendid success of the photograph business in this city, they are up-to-date in their line of work, and expect to gain a great deal of valuable information at the annual convention this week, where all that is new in the line of photo work is brought before the meeting and discussed to the best interests of all, with but one end, to a better and higher class of photograph work. They will return to Plattsmouth the latter part of the week with renewed energy from their few days of vacation, new ideas in the photo line, and fully prepared to render the very best results in their line. The studio will be open all this week but no sittings will be made until Friday.

### WILL RETURN HERE SOON.

From Monday's Daily. Yesterday G. R. Olson, who has been at Junction City, Kansas, for the past two years or more, came in on the Missouri Pacific and visited for the day, returning last evening to Junction City. Mr. Olson came to look after some business matters, but as the party whom he came to see was out of the city he returned to Junction City. Mr. Olson tells us that business is rapidly falling off in the kodak finishing line at the branch there and that he expects in a short time to close up the business at that point as all the soldiers will soon have been returned to civil life again. Upon the closing up of the branch there, Mr. Olson will return to Plattsmouth to give the management of the business here his personal attention.

### WE NEED GOOD ROADS.

From Monday's Daily. The movement for good roads is born out of something more than a mere desire to have some place for nice riding. Some of the mail routes are almost impassable. We are told of a certain route in this county that is badly washed out, with one bridge which is almost impassable, and that the weeds overhang the track, so that they are continually brushing the cars, as they pass and preventing the driver from seeing the ruts until he has run into them. The need of good roads are a real thing with the carriers, but an "ridiculous dream," of what they would like to have, but what is absolutely needed to get by. They have to go every day, and if the roads are bad they are bad all the time, and should be repaired. Just as well have good roads as some that are impossible. The good ones come the cheapest in the long run.

## ELECTRIC LIGHT AND POWER

### Which Plant Will Serve You Best?

One is the noisy vibrating kind. The other is the Silent Alamo

One is a plant that is noisy. It rattles and bangs—it shakes and quivers and jumps and bumps. The whole thing is in a continual state of severe vibration all the time. The other is the Silent Alamo. It runs noiselessly like a little electric motor. This is due to the noiseless, rotating, sleeve-valve motor—the quietest type of motor ever built. And there is no vibration. This is due to the scientific balancing of weight. Remembering that the motor is the vital part of any electric light and power plant; and, remembering, too, that vibration which shakes everything out of alignment, destroys adjustments, etc., is certain ruination to a motor—which electric light plant will give you the best service? You can answer the question for yourself.

## Silent ALAMO

Electric Light and Power Plant

The great question today is: "What plant shall I select?" And wise buyers will always look at the motor first and at the precautions taken by the manufacturer to safeguard the motor and assure dependable service without trouble or delays.

automobile. It is a sturdy, complete unit, all enclosed, and on one base (except the batteries) and is the most perfect running machine we have ever seen.

### Investigate the Silent Alamo

We have canvassed the entire field. We have selected the Silent Alamo because we find that it is everywhere proving itself to be the leader. Every part is built with the care of a high priced

### MURRAY, ARRIVED AT NEW YORK FROM FRANCE YESTERDAY

From Monday's Daily. Corporal Raymond Wood, who went to the service early last year and who has now seen about a year of overseas service arrived at New York yesterday, and will be assigned to some camp for discharge in a short time. At the time of his departure for the service, he was united in marriage, the wife remaining behind to keep the home fires burning. Mr. Wood is a fine young man and we are certain he has made an excellent soldier and will, upon his return, make one of the best of citizens as well.

### BACK HOME FROM THE NAVY.

From Monday's Daily. Last week John McCreary, who enlisted in the service of the government in the navy and who has been at San Francisco for the past year,

returned home, having been discharged from the service at Denver a week ago. John went to San Francisco about a year ago, at the same time nine more from this place enlisted in the navy, and he remained in the service longest. He was located on the island in San Francisco bay during his entire term of service but quite recently thought he was going to have to go to Chinese waters. However, the call didn't come and his discharge order arrived in time to accomplish his discharge, as related above.
