THAT HOMECOMING.

There was much speculation. home. There were about 4,000,000 of them in American camps and in training or service abroad. They trying to beat the high cost of neck- had become accustomed to a new mode of life. Half of them had seen new lands and peoples. Nearly half had gone through the ordeal of warfare, with its hardships, horrors and strange innovations.

> In what mood would those men return? Would they fit into their old niches in business, industry and social life? Would they be content again in civilian work? Or would they turn to iconoclasts and revolu-

> Most of them have come home by this time. Since the signing of the armistice over 3,000,000 enlisted men and officers have been discharged from the army. And what is the

Anybody can see for himself. There is no revolution. Those men getting jobs and going back to work and taking their places in the social and economic scheme with surprising ease and promptness. They

disciplined, better men mentally, and use in the coffee and on the physically and morally. They are more progressive, energetic and con-Uncle Sam's air postmen went on fident. That is about all-but it is a great deal, and it is something for up at the docks, but the equalizawhich most of the people at home were not prepared.

of the loss of steadiness and stamina tion will clear up before long. "Buy your coal now, if you've got that so many feared, the nation

A LEAGUE TO RIGHT WRONGS.

It is rather confidently expected at Washington that Japan herself will cut the Gordian knot of the Shantung controversy by making an explicit statement of her honorable intentions with regard to the peninsula and set a definite date for returning it to China.

Such action would be wise and timely. It would conciliate American opinion and promote good feeling between the United States and Japan. It would help greatly in smoothing the way toward ratification of the peace treaty and restoring order and confidence throughout

If Japan, however, declines to adopt this sensible and honorable procedure, what is to be done about Shantung? Shall the Shantung situation be allowed to upset the whole plan for permanent, peaceful world organization, or shall world organization be utilized to sraighten out the Shantung situation?

A level headed observer reminds the public that "if China has been wronged in any way by Japan, or Japan fails to keep its pledges, the League of Nations is the only inhope to obtain redress and justice.

SCHOOL CREDITS FOR FARMING.

So good has been the work done by boys and girls in Maine agricultural clubs that school superintendents have decided to give credit for it. In the grade schools boys and girls will be given honorary consideration for their farm club work. In the high schools one-fourth credit will be given for every year of satisfactorily completed work in any

it is a sensible plan. Many of those boys and girls may go on to agricultural colleges; and if they are encouraged in their desire for furwell-done farm work, so much the better. There is also a good deal work than might appear on the surface. There is very practical arithmetic, for any successful club worker knows how much he or she pays for materials and how much touches the school curriculum at chemistry and nature study involved in the club member's agricultur-

It is a fine thing to recognize the gains already made through these clubs, and to encourage other boys and girls to join them.

PLENTY OF SUGAR.

There is no lack of sugar in the country now, nor will there be, says George A. Zabriskie, president of than eleven cents a pound retail

or hoarding. Profiteers if reported may have their licenses revoked.

There has been an apparent short age, due to belated orders from were holding off in hopes of a lower price. These people have now realized what the price situation is and will be, and many of them have placed big orders at once. There is however, plenty of sugar to fill these They are healthier, stronger, more orders and to do the home canning

berries besides. The marine workers strike has been tying some of the sugar ships tion board is sending radios to ships at sea, diverting them to Cuba For these practical gains instead to get raw sugar, and this condi-

> It gives one a comfortable feeling to know that some central authority is taking hold of the sugar situation and getting results, both in distribution and in prices.

If this can be done for sugar why can it not be done for other

No Camouflage in This Price

We have reduced the Titan 10-20 price \$225. You can now get the world's standard 3-plow tractor for \$1,000.

Titan 10-20 Cash F.O.B. Factory

\$1,050 on Time

HERE is no "joker" in this price. We are not telling you one story in this advertisement and then leaving it for our dealers to break the sad news that the advertised price won't buy a tractor unless you pay extra for a lot of necessary features. The Titan dealer won't charge you extra for "starting and service" before he can deliver the tractor. He won't show you a machine stripped of many essential parts—belt pulley, fenders, platform, governor, drawbar, tools-and then tell you that you can have these things by paying extra for them. The Titan at this advertised price is a complete 3-plcw kerosene tractor.

Then there is another thing. We are not experimenting at your expense when we sell you a Titan 10-20. There is real farm machine and tractor manufacturing ing experience back of it. We have been in the farm machine business for 88 years and have been supplying tractors for 14 years. Not another company in the world knows the farmer's power and machine requirements as the Harvester organization does,

Would you entrust your bank account to a man who had never had any experience in handling money? Will you risk your farm profits in a tractor built by designers whose knowledge of farming is limited to books and a drawing board? It will pay you to think about these things when you buy your tractor.

Starting and Instruction Service

Another "joker" of some tractor concerns is to charge you a large "starting and service" fee-extra. This is another way of getting a low price for advertising purposes. But you can't get the tractor without paying this charge, They make it compulsory. The International dealer gives you this service without asking you to pay extra for it when you buy a Titan 10-20. Free tractor schools inaugurated by us, also benefit Titan purchasers in all parts of the country.

INTERNATIONAL HARVESTER COMPANY OF AMERICA INC. USA CHICAGO

When you buy a TITAN the original price includes:

Friction Clutch Pulley

A large, wide friction clutch pulley, made in five sizes, equipped with safety shield, is mounted directly on the crank-shaft of the low-speed, steady Titan engine and delivers the full power to the driven machine. The Titan 10-20 can be quickly backed into the belt because of the location of the pulley and the belt clears the front wheels and other parts of the tractor by a generous margin. It is not necessary to dig holes for the front wheels to get belt clearance. The Titan pulley was not put on as an afterthought. The designers did not overlook it is

Throttle Governor

needed. Which is the best economy-to pay an operator a salary just to sit on the tractor and adust the fuel to the load variations when engaged in belt work or let a throttle governor do it without extra cost? - do it automatically, perfectly. The Titan throttle governor saves fuel, prevents grain losses by delivering uniform power to your thresher and lengthens the life of both tractor and driven machines. You get this governor without extra charge.

Drawbar Some tractor builders put a hook and eye affair on the tail end of their tractors- and call it a drawbar! They seem to have overlooked the fact that a farm tractor not only pulls plows but also mowers, hay loaders, grain binders, harvesterthreshers, etc., each requiring different hitch adjustment. Perhaps they didn't know about these other machines. Look at the Titan drawbar. Note the provisions for a wide range of adjustment both up and down and sidewise. The Titan drau it is furnished without extra cost.

Fenders The designers of some tractors evidently did not know that the drive wheels throw dirt, dust or mud over the operator and machine unless fenders prevent it. The Titan 10-20 has such fenders. They are also a "safety first" feature. The state of Michigan has passed a law prohibiting the sale of fenderless tractors. Tilan fenders are furnished without the \$40 to \$50 extra charge made by the "low-price" manufacturers.

Some tractor designers apparently never sat in a tractor sea Platform Some tractor designers apparency have rough fields, so the can't appreciate what a relief it is for the tractor operator to rest himself no and then by standing up, without loss of time. You will appreciate the Titan 10-2 platform that enables you to do this. It is a comfort feature furnished regular! with every Titan 10-20 tractor-no extra cost.

Tools A complete set of sixteen tools is furnished with every Titan 10-2.

This handy tool-kit is provided in spite of the fact that Titan 10-2. tractors get out of order less frequently than any other tractors in the worl Some tractor concerns whose tractors really need frequent adjustment and repair furnish nothing but two or three wrenches. They tell you that their product so good that it doesn't need adjustment. Do you believe this? As a matter fact, they omit necessary tools for the same reason they omit the essential feature. described above-to make a low "camouflage price"! The Titan 10-20 cor, plete tool kit is furnished without extra charge.
