SCALES OF FISH MEASURE FOUR INCHES IN DIAMETER

When the ordinary fisherman brings in a large trout or bass and

feels proud of it, he doesn't remember that there are other fish more gamey and greater fighters, the scales alone of which measure four inches in diameter. The fish referred to is the mighty fighting tarpon, caught off the coast of Florida. To see these giants of the sea caught with rod and line is one of the many pleasures that await patrons of Lyman H. Howe's Travel Festival coming to the Parmele on Tuesday, October 21st.

The tarpon fishing pictures are probably the most remarkable ever taken of the nimrod's delight. A gigantic silver tipped fish weighing 185 pounds is finally caught, after a strenuous battle of over two hours, by a slip of a woman weighing only 101 pounds.

This is the 25th year of Mr. Howe's career as a public exhibitor, and in commemoration of the event, a "Silver Jubilee" program of special importance for its excellence and diversity of subjects, is being presented. Other features of the anniversary program, in addition to the thrilling tarpon fishing pictures, include a novel hand-car excursion down the Andes in Peru, a visit to the mammoth Bethlehem steel plants (where the big strike is now in effect), a stroll through the exquisite Magnolia Gardens of South Carolina, a day at a girls' camp in the wilds of Maine (where exciting aquatic feats are performed by nimble water nymphs), thrilling adventures above the clouds in the Canadian Rockies, visits to the homes and haunts of famous moving picture stars, animated likenesses of musical celebrities, past and present, expertly modeled in clay, amusing stories of animals and birds and, of course, the usual delightful Howe comedy cartoons and film novelties.
