All property must be settled for before being removed from the premises. W. H. PORTER, Owner. L. J. HALL, Auctioneer. JACK PATTERSON, Clerk.

BURLINGTON STORING COAL ON NEB. LINES

MORE THAN 100,000 TONS NOW HELD AGAINST POSSIBLE FAMINE PERIOD.

MOVING COAL CARS RAPIDLY

Long Strings of Empties Being Pulled Through Plattsmouth, as Well as the Loaded Ones

From Saturday's Daily. The Burlington railroad is moving rapidly in the effort to offset unwelcome conditions should a coal strike be called a week from today. Every mine on the system is being supplied with as many cars as it can fill each day and the loadings in a good many instances are greater than ever before in the history of the road.

The Nebraska district of the road has more than one hundred thousand tons of storage coal left over from last season, 65,000 tons of this being on the Lincoln division and 27,000 tons on the Omaha division. Every day heavily loaded trains go through Plattsmouth hauling coal to the central and western parts of the state not easily accessible from the Wyoming mines and a like number of empties are moving eastward as rapidly as the giant engines can get them over the road.

Reports from the Sheridan division of the road indicate that a great deal of coal is being loaded there and no delay is permitted in the movement of coal from the mines, the movement being kept up with the loading.

The recently reported shortage of coal at Nebraska City was merely a local matter and conditions here are most encouraging. Coal that had been shipped to Nebraska City for the use of the road was delayed en route. The company had coal at Omaha, Lincoln and Wymore which it could have sent there, but rather than do this the agent at Nebraska City was ordered to purchase a car of a Nebraska City dealer.

Railroad men and others in this territory have been interested in the statement of the governor of Iowa that he will see that coal is mined in that state regardless of the striking miners. There are several important mines along the Burlington main line east of here, around Centerville, Chariton, Whitebreast and Melcher and Iowa soft coal is considerably in demand.

COUNTY JUDGE HAS BUSY DAY.

From Saturday's Daily. County Judge Beeson, whose reputation as an ally of Cupid, has traveled far and wide over the confines of our fair state, has had a sudden burst of business in the matrimonial line and as the result of his efficient work has made four hearts happy. Yesterday afternoon David Stuart and Mrs. Mattie Pickering, both from the vicinity of Wyoming, Otoe county, called at the court house and secured the necessary permit to wed and requested Judge Beeson to perform the ceremony that was to make them as one and the judge accommodated them in his usual pleasing manner.

This morning John Derooy Banks and Miss Marie A. Skola, both of Omaha, visited the license department of the county judge's office and secured their desired license to permit them to enjoy the journey of life together and were also united in the bonds of wedlock by the court, after which they departed rejoicing in their new found happiness.

DEATH OF MILTON F. STONER

From Saturday's Daily. Mr. and Mrs. George Stoner received the sad news Monday morning of the sudden death of their son, Milton, who had died at five o'clock that morning of heart failure at McCook, Nebraska, where he has been in the employ of the Burlington railroad the last fifteen years.

He was serving as yard clerk at the time of his death. He was on duty and had gone from the office to the yard whistling not more than an hour before he was missed, and when searched for was found in a way car where he evidently had gone when

the attack came on. He was in a serious condition and soon passed away. As he had one of the attacks about a week before, his fellow-workmen knew what had happened just as soon as he was missed.

The remains were brought here Tuesday morning and taken to the home of his parents on the south side, where funeral services are being held this (Thursday) afternoon at two o'clock, conducted by the Rev. W. F. Haskins of the M. E. church. "Mitt," as he was familiarly known here was 43 years of age May 1st last. He was of a jolly nature and a friend to everybody. He was the second son of Mr. and Mrs. Stoner and leaves to mourn his loss beside his parents, two sisters, Mrs. E. D. Hunter, of Stockton, Kansas and Mrs. Carl Stamm, of Omaha; four brothers, Lowell, of San Antonio, Texas; Lee, of Rochester, N. Y.; Will of University Place and Ern of Omaha, who were all present at the funeral but Lee, who was unable to get here.—Weeping Water Republican.

CLOSE OF A SUCCESSFUL ASSEMBLY

Sunday School Convention at Avoca Closes Meetings Yesterday by the Election of Officers.

From Saturday's Daily. The meeting of the Cass county Sunday schools which have been meeting in convention Thursday and Friday, was brought to a close yesterday afternoon by the election of the officers for the ensuing year. The convention has been one of the most successful that has been held in the county both in point of attendance and in the keen interest taken in the proceedings of the meetings. Lectures were given by the leading workers of the state and much good in the work secured through the excellent lectures offered on the work of teachers training and special methods of handling the Sunday school.

At the closing session yesterday afternoon it was voted to hold the next meeting of the convention at Elmwood in 1920 and the sentiment was unanimous that this enterprising little city be given the honor of being host to the Sunday school workers of the county.

The election of the officers for the year resulted in the following being selected:

- President—Rev. A. H. Schwab, Murdock.
- Vice President—Jesse P. Perry, Plattsmouth.
- Secretary-Treasurer—G. P. Sheckley, Avoca.
- The superintendent of the different departments of the Sunday school work were named as follows: Children's department—Mrs. J. W. Brendel, Avoca.
- Young People—Mrs. Emma Pease, Plattsmouth.
- Adult—Luther L. Pickett, Plattsmouth.
- Home—Mrs. Ella Atchison, Elmwood.
- Visitation—A. L. Tidd, Plattsmouth.
- Teacher's Training—Mrs. Fred Zink, Murdock.
- Pastor's—Rev. J. D. Dutton, Louisville.
- Missionary—Miss Rachael Stander, Louisville.
- Temperance—Rev. L. W. Scott, Plattsmouth.
- School Administration—J. M. Teegarden, Weeping Water.

RECEIVES PLEASANT NEWS.

From Friday's Daily. The visitors at the court house this morning as well as the county officials have wondered at the pleased expression that would now and then flit over the countenance of the custodian of the building, Hans Seivers—but the secret is out—the genial custodian is once more a proud grandfather. The pleasant news was received last evening by Mr. and Mrs. Seivers announcing the arrival of a fine little daughter at the home of Mr. and Mrs. William Heldman at Fargo, North Dakota, on last Sunday. Mrs. Heldman is a daughter of Mr. and Mrs. Seivers and the pleasant news has brought much joy to the grandparents in this city.

An Agreeable Surprise.

"About three years ago when I was suffering from a severe cold on my lungs and coughed most of the time night and day, I tried a bottle of Chamberlain's Cough Remedy and was surprised at the promptness with which it gave me relief," writes Mrs. James Brown, Clark Mills, N. Y. Many another has been surprised and pleased with the prompt relief afforded by this remedy.

HOGS DROP AS RECEIPTS GET HEAVIER

CHICAGO MARKET UNDER \$12 FOR FIRST TIME SINCE EARLY IN THE WAR.

BIGGER DECLINE ANTICIPATED

Omaha Price Leads Eastern Markets, Contrary to Former Custom.

From Thursday's Daily. A further sharp drop of from 75 cents to \$1 per hundred weight in the price of hogs was recorded on the principal live stock markets yesterday.

The drop brought the Omaha price down to quotations of from \$12 to \$12.50 and the Chicago market went under \$12 for the first time since early in the war.

If applied to the annual production of hogs in Nebraska, a dollar drop means a loss of approximately \$8,000,000 to Nebraska hog raisers.

Chicago market experts ascribe the high cost of feed as a chief reason for unusually heavy marketing of hogs, which has demoralized the market. The drop today was accompanied by pronounced weakness in the prices of grains and provisions.

Expects Further Drop.

R. C. Howe, general manager of Armour & Co. in Omaha, disagrees with the Chicago analysis and predicts still lower prices, probably a \$10 figure, before many weeks have passed.

"The simple fact is that the price of hogs has been abnormally high," said Mr. Howe. "If the packers have made a mistake, it has been in paying too high prices. These prices are bound to tumble."

"We have a big corn crop, of good quality. That will make cheaper feed. With \$1.25 corn, we should have \$10 hogs."

Receipts Heavy.

"The present drop in price is due to the fact that raisers realize the fact that the price has been abnormally high and that it is likely to go even lower than at present. They are rushing to get under the wire."

"Cattle are cheap now, compared with other live stock, and I do not think that they will drop as a reflection of the drop in hogs."

The Omaha price continued today to be higher than that of Chicago, this having been the case generally for several weeks. Until recently, the Chicago market was uniformly higher, due to the additional freight charge, but this has been absorbed lately. This is further proof, according to Mr. Howell, that the buyers do not mean to continue to meet the high price.

SOCIAL WORKERS REORGANIZED

The Social Workers South of Town Take New Life After the Conclusion of Red Cross Work.

As a patriotic bunch of working American women, the social workers club south of the city, when the work required by the government grew heavy, they voluntarily disbanded the meetings of the social workers club, and put forth every energy in behalf of the things which were necessary and required by the Red Cross, and formed a branch of that order and with a sacrifice which was admirable worked to do all possible for the boys while they remained overseas, or in camps here.

Now that the strife is over, and the work for the Red Cross is completed they have taken up their club work again.

At a meeting last Wednesday at the home of Mrs. Charles Manners they took up the matter of reorganization, and after having looked after the business matters gave their attention to a good time and you may judge they had it, too. Miss Clara Munn entertained the crowd, which was large, by a number of selections on the piano, which was greatly enjoyed. The ladies were served a very delightful lunch by Mesdames Samuel Gilmore and Charles Manners.

The next meeting will be held at the home of Mr. and Mrs. Arthur Sullivan on Wednesday, November 19th, and at which an excellent time is assured. The following officers were elected for the coming year. Mrs. Charles Manners, president; Mrs. Frank Hull, secretary; and Mrs. Arthur Sullivan, treasurer.

How Much are you Paying for Oil?

The gallon price is the smallest item of oil cost.

Engine wear and tear, the cost of overhauling and repairs, the smaller mileage you get from each gallon of gasoline—these are the hidden costs in cheap, inferior, unsuitable oil.

Polarine Oil is made to meet every engine need and service condition. It protects bearings and engaging parts with a cushion of pure lubricant that safeguards against wear and keeps the engine running quietly, with a minimum of vibration and strain.

Polarine maintains a gas-tight seal between piston rings and cylinder walls that gets maximum mileage and power out of every drop of gasoline. It keeps fuel bills down.

Let Polarine keep your motoring costs down. Buy it where you buy clean-burning power-packed Red Crown Gasoline—where you see this sign—at first class garages and service stations everywhere.

STANDARD OIL COMPANY (NEBRASKA) Omaha

Polarine

DEVELOPMENT OF A HIGH CLASS INDUSTRY

L. C. Sharp Has Factory That Is One of the Busiest Places in the State and Whose Output Travels Far.

In the past few years the L. C. Sharp Manufacturing Company of this city has developed their plant to such an extent that it is now one of the leading establishments of its kind in the state and the future for the institution points to greater successes in producing and turning out machinery of the highest type.

Mr. Sharp has in his plant developed his ice cream cone machine to such an extent that it is now one of the most perfect machines of its kind on the market and recognized by all as the most economical and laboring saving device that has been perfected for the manufacture of the popular ice cream cone. That the machine is undoubtedly the best on the market is demonstrated by the fact that it is universally in demand on the market today and the demand for the machine is greater than can be supplied. In the factory now they are preparing three of these machines for shipment to Manchester, England, the great manufacturing center of that nation where they will be used in the manufacture of the ice cream cones for the English people. The plant here is also completing a contract for ten of the machines to be delivered to one of the largest plants at Kansas City, Missouri, where several of the machines had been sold previously and where they made a great saving in material and labor in turning out the cones ready for the market.

Another of the machines that has been developed by Mr. Sharp and produced by his force of skilled workmen is the patent butter cutting device that permits large quantities of butter to be cut and prepared for market in a much cheaper and sanitary method than any machine on the market today. This machine is being universally adopted by the creamery companies of the country and the Fairmont creamery of Omaha has purchased a number of the machines and are contracting for several more to be placed in their plants in various parts of the state. Mr. Sharp has just received a letter from the president of the company stating that one of these machines has in ninety days of use saved to the company the sum of \$4,000. This machine not only cuts accurately and quickly but also permits the butter to remain at the same temperature and not lose any of the products through the changes in temperature as it is fully capable of cutting the butter when at the freezing temperature.

The specialization in the food saving machinery which has been a study of Mr. Sharp has also resulted in the production of a food cutting and milling machine that is destined to work wonders in the production of stock food at a very low cost and in a manner that insures to the farmer and the stock raiser the most intense form of food stuff at smaller cost and at the saving of space and labor that is required of stock food in its original form. This machinery consists of the food cutting and meal machines that takes the common corn stalk and reduces it to the most intense form of food for stock of all kinds. The cutting machine saves every particle of corn stalk or alfalfa and does away with the loss of a great deal of the valuable food that is lost in the old methods of handling as there are no particles rejected by the cutting machines but are all used up in the preparation of the food. When hay, alfalfa or corn stalks are used in their original forms for stock food they require much space for storing and also a great deal of loss caused by the methods of handling and therefore it is a more costly process to the farmer and stock raiser. With the special machinery produced by Mr. Sharp this stock food is prepared in a meal form with the use of small portions of corn and molasses

or solidified form for the use of the stock food that contains the best and most enriching foods without the loss that comes from the old and more expensive methods of handling and the saving both in the production of the food and also in the amount of space that is required to store and handle the stock food makes a great saving to the farmer.

The new mill that is being erected in this city is to be prepared with four lines of these machines producing ten tons of the intensified stock food and it is safe to say that this plant when it is ready for operation will have a revolutionizing effect on the methods of stock feeding throughout this section of the west by producing the food in meal or solidified form for the use of the stock raiser.
