First Call For Winter

Will your buildings be an easy mark for the attacks of cold weather?

They won't if you take a little time right now to do the necessary repair work. Be sure to put some good sash in those open windows in the barn, hog house or poultry house. Cut another window in the dark parts of the barn and get more light on the dull winter days.

Inspect the roofs. Will they stand the test of driving rain and heavy snow? How about your cattle barn and other shelter? It doesn't take long to put everything in good shape if you check up on your buildings and get the material now.
