

To try to control railroad rates by arbitrarily limiting profits is to put the manager who makes his profits by efficiency and economy on the same level as the one who tries to accomplish the same result through extortionate charges.

—Hadley, Railroad Securities Commission, Report to the President—1917.

THE old-time pack-bearer could carry a hundred pounds ten miles a day.

The railroad is the modern pack-bearer. For every employee it carries 2,000 times as much.

Back of each railroad worker there is a \$10,000 investment in tracks and trains and terminals, with steam and electricity harnessed like a great beast of burden.

Without this mighty transportation machine the railroad worker could do no more than the old-time packer. But with it he is enabled to earn the highest railroad wages paid in the world, while the country gains the lowest-cost transportation in the world.

The modern railroad does as much work for half a cent as the pack-bearer could do for a full day's pay.

The investment of capital in transportation and other industries increases production, spreads prosperity and advances civilization.

To enlarge our railroads so that they may keep pace with the Nation's increasing production, to improve them so that freight may be hauled with less and less human effort—a constant stream of new capital needs to be attracted.

Under wise public regulation the growth of railroads will be stimulated, the country will be adequately and economically served, labor will receive its full share of the fruits of good management, and investors will be fairly rewarded.

WOLPH BROS. WINNINGS AT RECENT INTERNATIONAL SHOW

In complying with the News-Ledger's request for a list of their winnings at recent International show, we are given the following, which is seldom equaled by any breeder, and is truly one these boys, Paul and Constant Wolph can justly be proud of.

At the International Live Stock Exposition, the largest stock show in the world, we showed six Galloways in five classes in the breeding section. We won three firsts, one third one fourth and fifth prizes in the strongest competition the Galloways have had in years. We also showed one calf in the fat class which won the Galloway special for the best grade Galloway in the show.

In the Poland-China section we won one first, one second, one third and two fifth prizes in the largest Poland-China show in the history of the exposition. We showed only one Hampshire, that a senior pig on which we won fifth—Nehawka News-Ledger.

Corporal Alvin C. Huff writes to his mother from far off Siberia where he has been for several months and where he expects to be stationed for several months to come. He inquires about his old friends in Louisville and sends them his best regards. Alvin is a good soldier and does not complain of his lot, but we judge that it must be weary work to put in so long a time in that country, although he is getting some wonderful experience and is inclined to look upon the bright side of it.

Those who have passed the farm of Henry Meierjuegen have noticed a sight which is rather unfamiliar to this section. He had two six horse teams busy turning over the clover sod and turning under 5 and 6 inches of snow. Henry ought to have plenty of moisture in the soil to raise a good crop after this process.

Mr. and Mrs. Clark Gonzales were the recipients of a fine and most acceptable Christmas present, December 25, 1919. They are the proud parents of a fine baby girl. Clark is the product daddy on earth and both mother and father have the hearty congratulations of a host of friends.

No Great Act of Heroism Required.

If some great act of heroism was necessary to protect a child from the croup, no mother would hesitate to protect her offspring, but when it is only necessary to keep at hand a bottle of Chamberlain's Cough Remedy and give it as soon as the first indication of croup appears, there are many who neglect it. Chamberlain's Cough Remedy is within the reach of all and is prompt and effective.
