Don't tag on behind; better be a cow's horn than her tail.

In a weather way this new year is the best of old time's babies.

People talk about cheap money, but none of it drifts our way.

The Turks are said to be about ready to give up—everything but money.

Even the government fixers seem to think fair prices mean all the public will pay.

By this time Mr. Gerard must be realizing that his boom is not a growing variety.

If the average man had some mint and had some julep he would have some mint julep.

Attorney General Palmer does not talk much like a presidential possibility as he did at first.

Berger will be getting an idea he is presidential timber if they do not cut him down good and hard.

Some of the country papers still are grumbling more about the daylight saving last summer than the daylight robberies now.

A man who received a package of eggs by mail the other day found half of the contents missing. That's what you call partial post.

Ten Provinces in Mexico were visited by earthquakes last week. Unfortunately, the quakes did not shake the cussedness out of the people.

Now that Washington has ruled that booze may still be used for kitchen purposes, a man advertises for a job as cook. Suppose his specialty must be stews.

The league of nations will not be the issue in the next campaign asserts Champ Clark. The paramount issue, he says, will be domestic. In many households it is that already.

No doubt it would help Mr. Hoover's young boom if he would find something for housewives to do with all those food substitutes which have been cluttering up the basement and attic since he sold them broadcast two years ago.

Back in the good old days a dollar used to get up on its hind legs and yell like a grand opera tenor, but now it makes no more noise than the kid glove dropping into a bed of mortar. Just a faint "squash" and nothing more.

The high cost of print paper is giving certain country editors a little something else to talk about besides the hideous indifference of the business men in failing to support the town band, basket ball team, lyceum course and other non-essentials in style to which they have been accustomed.

Miss Jeanette Teegarden who has just completed her work as census taker for Weeping Water city reports our population as 1089. Sixteen of these are transient railway laborers. The 1908 census showed our population as 1067.—Weeping Water Republican.

No Great Act of Heroism Required

If some great act of heroism was necessary to protect a child from croup, no mother would hesitate to protect her offspring, but when it is only necessary to keep at hand a bottle of Chamberlain's Cough Remedy and give it as soon as the first indication of croup appears, there are many who neglect it. Chamberlain's Cough Remedy is within the reach of all and is prompt and effective.

RESIDENT OF COUNTY FOR 48 YEARS

James M. Robertson, Clerk of the District Court, Has Resided Here Near Half Century

From Thursday's Daily.

Forty-eight years ago on January 10, 1872, there arrived in Plattsmouth a young man, who had arrived only a short time before from his native land of Scotland, and who had set his mind on making his mark in the new world in which he was locating. This young man was James M. Robertson, who had on January 1, 1872, first set foot on the United States soil at Portland, Maine, and attracted by the opportunities in the country west of the Mississippi, he came to Nebraska to make his home.

During the years since his arrival here, Mr. Robertson has resided on his farm near Louisville and in that city until coming to Plattsmouth to reside twenty-five years ago.

There are few men who enjoy the general good feeling and respect of the people of the county such as is commanded by Mr. Robertson and his pleasant and accommodating conduct of his office has made friends of all those who have had the opportunity of meeting him in a business way and it is safe to say that "Jim" Robertson, as he is well known to the older residents of the county, has more friends to the square mile than any man in the county.

The railroads are indispensable to the economic life, and railway securities are the very heart of most investments, large and small, public and private, by individuals and by institutions.
WOODROW WILSON

THE war could not have been won without railroads. Transport—by rail and sea—is an indispensable arm of national defense.

Carrying capacity, from the wheat fields and the mines and the steel mills to the front lines in France, was the measure of our power in war.

And it is the measure of our power in peace.

Industrial expansion—increasing national prosperity—greater world trade—are vitally dependent on railroad growth.

The limit to the productive power of this country is the limit set by railroad capacity to haul the products of our industry.

The amount of freight carried on American rails doubled from 1897 to 1905—since that year it has doubled again.

It will double still again.

To haul this rapidly growing traffic the country must have more railroads—more cars and engines—more tracks and terminals.

Sound national legislation, broad-visioned public regulation will encourage the expansion of railroads, without which the nation cannot grow.
