FILES ANSWER IN BIG DAMAGE CASE

Answer of Walker D. Hines, Director General of Railroads in Case of William A. Stewart.

From Wednesday's Daily.

In speaking of the damage suit occasioned by the serious automobile accident occurring last winter near Greenwood the State Journal of today has the following:

Walker D. Hines, director general of American railroads, Tuesday afternoon filed separate answers in the United States district court to the \$15,000 damage suit of Everett H. Coleman, a minor, by his next friend, W. A. Stewart, and \$25,000 damage action of William A. Stewart, administrator of the estate of John William Stewart, deceased. The defendant alleges that the injuries received by Everett H. Coleman were caused by his own negligence, and

he insists that William A. Stewart has no right to act as the guardian for the boy and that he had never gained the consent of the rightful guardian of Coleman to prosecute the suit against the Burlington railroad. In this case of John William Stewart who was killed in January, 1920, the director general avers that his death was due to his own carelessness and not to any negligence on the part of the railroad or any of its agents or servants. In the petitions filed it is alleged that John William Stewart was killed by a Burlington train at a grade crossing at Greenwood and that Everett H. Coleman was permanently hurt in the same manner. The boys were riding in an automobile when the accident occurred and the defendant railroad and the director general of railroads are charged with responsibility for the accident.

CHECK RIVER EFFECTIVELY

From Tuesday's Daily.

The Burlington seems to have been very successful in their battle with the Missouri river on the Iowa side of the stream just east of this city. A large amount of rock-as well as brush was shipped in by the company to use in the retaining mat in the rip rap, replacing that part which was washed out by the break of the river last week. The residents of that portion of Mills county report that the conditions at the place where the break occurred have about resumed normal and it is now thought that all danger of serious injury is past but the efforts of the river to cut into the Iowa shore has made a keen watch necessary by the railroad and the farmers whose places adjoin the stream.
