A full range of styles to select from. All sizes — for men, women and children await you, at prices no higher than you would pay for ordinary grades.

CA Six-Room Colonial House

HOW would you like to own the home pictured here? Certainly you could be proud of it, for where will you find a prettier, cozier home than this six-room Colonial house? And it is inexpensive to build, too.

Downstairs are three large rooms—living room, dining room and kitchen. There is also a small reception hall connecting the living room and dining room. Upstairs there are three bedrooms, and a bathroom. Each of the bedrooms has a roomy closet adjoining. The combination bookcases and window seat, as shown here, give you an idea of the usefulness and practicality of Curtis built-in woodwork.

And this home is but one of more than two hundred homes with Curtis Woodwork that were designed by Trowbridge & Ackerman, noted architects of New York. Other equally pretty, correctly designed homes, ranging in size from three to eight rooms are shown in portfolios. We will be glad to obtain a "Better Built Homes" portfolio for you, free of charge, upon request. Come in and talk over your home-building plans with us, so that you can begin now to start action on realizing a home of your own.

"Wall-Surface Satisfaction"

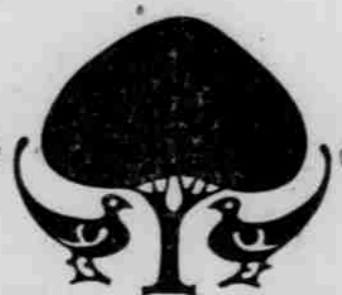

DRESSING the walls is one of the arts of today. More money is being put into it by the average family than, say for pictures or other wall decoration. From the mere covering of an unsightly wall surface, it has grown to the dignity of a decorative art.

Can there be any surprise, therefore, in the fact that the public is evincing a greater interest in better wall decoration?

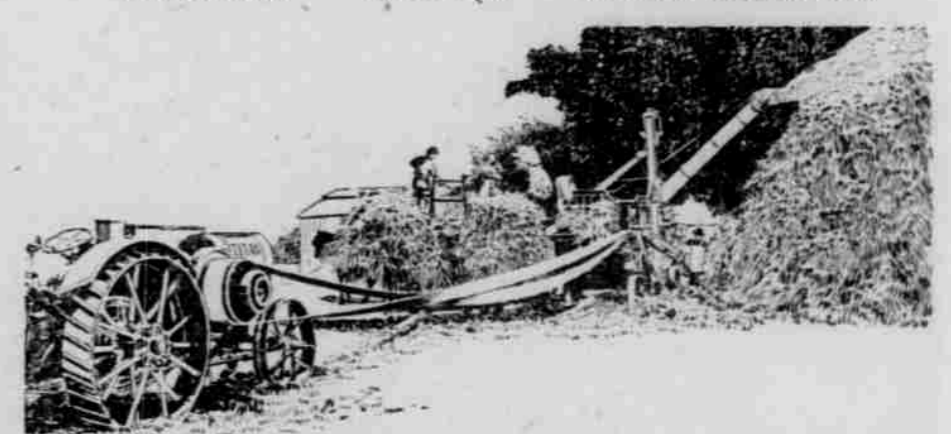

And having helped to lift wall decoration to its proper place in home beautification, we feel this concerns the interest of every home owner who feels justly satisfied with only the best in home decoration.
