## That "Saving" Habit

Saving is a matter of habit. And the habit grows, just like the savings.

To acquire the habit when young with small sums is to practice the habit when older with larger sums.

So encourage the little fellows to start a savings account with us at once, and watch the habit grow.

#### NATURE'S LOVELIEST MOOD.

May is the sweetest month. Nature is in her loveliest mood, the lilacs and jacinths fill the air with their fragrances, the birds sing rapturously, and everybody enjoys the balmy breezes. Only those who suffer from stomach troubles do not feel like life is sweet. The delights of life are lost, if headaches, sleeplessness and poor appetite begin to torment you. But why do you suffer? Triner's American Elixir of Bitter Wine is sold at every drug store. It cleans the intestines, keeps the bowels open, helps digestion, and you need not stand in fear of indigestion, constipation and various troubles connected with stomach disorders. Keep also other Triner's remedies at hand, because they always give quick relief. Triner's Liniment is excellent for neuralgia, sprains, swellings, tired muscles or feet. Triner's Cough Sedative is the best remedy for colds and coughs.—Joseph Triner Company, 1333-43 S. Ashland Ave., Chicago, Ill.

#### FOR STRICT MARRIAGE LAWS

Hays Kas., May 15.—More strict marriage laws were urged in the report of the legislation department of the Kansas Federation of Women's Clubs, submitted to the annual meeting of the federation this week. The report included a number of proposed laws which had been submitted by members. It is the announced plan of the federation to sift these down to possibly three or four and place them before the next session of the legislature.

One of the recommendations included in the report was the state law providing for the "sterilization of epileptics when necessary" by enforced, and to bring about the result, state officials, to whom the duty of its enforcement is delegated by the law, be made subject to a penalty in case they fail to carry out the letter of the law. This would require an amendment to the law, which now carries no penalty, it was pointed out.

The law provides, it was stated, that heads of certain charitable and penal institutions of the state are empowered to enforce this law on subjects of epilepsy whose conduct has indicated that there is danger of bringing defective children into the world. The question of requiring physical standards for those about to enter matrimony also was subject for discussion.
