### Some Less Wheat

The assessors books for Liberty precinct shows about nine hundred acres of winter wheat seeded, most of which is looking fine and is promising a good crop. This is less than the average amount which has been the custom to seed. Still the price should have been a stimulus to the heavier seeding of this cereal. And the prices go merrily on.

### Were Riding with Grim Specter

Last Monday morning very early in fact between midnight and one o'clock a party of people from Weeping Water and near there were coming from Omaha and wishing to make the train which is due near that hour at Union and having a case of Gasolinette, two cars were coming down the north road and while essaying to make the turn just east of Union, a Kissel car ran too fast and too near the edge of the bank and rolled over, making a complete obstruction, but lighting with the front of the car pointed in the opposite direction to which it was traveling, with the car nearly demolished. Two young men were in the car and one was badly injured, it requiring five stitches by Dr. W. M. Barritt to close the long gaping wound in the head of one of the young men. Death was riding in the rear seat of that car and when the car rolled over, his hand which he had on the shoulder of the young man slipped and thus enabled the specter to make his escape. Better drive a little steady boys, once over and the game is off.

### Union Schools Close.

Anyway the year's work has been done. The closing exercises were marked by the usual program. ## GREENWOOD DAMAGE SUIT NOW ON TRIAL

Jury is Secured in Federal Court for \$35,000 Damage Suit Filed by William A. Stewart.

From Tuesday's Daily.

A jury was secured in the United States district court Monday afternoon to try the \$35,000 damage suit of William Arthur Stewart, administrator of the estate of John William Stewart, deceased, against Walker D. Hines, director general of American railroads and the Burlington.

John William Stewart, nineteen years of age, was driving an automobile January 21, when he was killed at a railroad grade crossing at Greenwood. A companion was alleged to have been seriously hurt and a damage suit has been instituted in his behalf asking for \$15,000.

In a statement to the jury Lowe Ricketts, one of the attorneys for the plaintiff, said that the crossing where the accident occurred was at that time obscured by a dwelling house and a section house and that a clump of weeds four or five feet high also helped to hide the Burlington tracks. It was explained that the railroad runs through a deep cut near the crossing. He said that the plaintiff expected to prove that no signals were given of the approach of the passenger train and that the ordinance of Greenwood provided that warning signals should be maintained at the railroad crossing. The boy who was killed, it was alleged, had helped to support the family and was able to earn good wages as a railroad worker or as a farm hand and was strong and rugged.

Attorney Max V. Begthol for the defense, told the jury that it expected to show that there was nothing to obscure the crossing, and that as a matter of fact the accident occurred because the driver nor his companion looked to see if the train was coming. The defense expected to show that persons who witnessed the accident had heard the whistle of the approaching train and had even called to the two young men to look out for it, but no attention was paid to them. It was contended that the crossing was not located on one of the streets of Greenwood, but was one under the control of the railroad and opened simply for the convenience of travelers. The train does not stop at the village. It was pointed out that young Stewart was born and reared in the neighborhood and ought to have been thoroughly familiar with the particular crossing. It was contended that nothing could have been done by the defend-

ants or their servants to prevent the accident that snuffed out the life of the young man.

William A. Stewart, the plaintiff, and the father of the deceased, was the first witness. He testified that with the exception of the weeds being cut the crossing where the accident occurred, the alleged obstructions remain there as they were when the boy was killed. Photographs of the crossing were introduced in evidence and shown to the jury, and the father of the boy was called on to identify them. He testified that his son had worked most of the time and that the money he had earned except that spent for
