It is understood that Ashland will have a big representation at this meeting with the idea in view of having this road pass through that place. It would be the proper thing to have this road pass through Elmwood from the north and on through to the O street road to the south of us.

**Why That Headache?**

When you know the cause of a disease a cure may often be effected. This is particularly true of headache. Headache often results from constipation or a disordered condition of the stomach which may be corrected by taking a dose or two of Chamberlain's Tablets. Try it. These tablets are easy to take and mild and gentle in effect.

## EAGLE

Beacon

Harry Trunkenholz has been appointed road patrolman for six miles of federal aid road, west and south from Eagle. We'll bet a cookie these roads are now kept in better shape than they have been in the past.

Wm. Wall has been employed as road patrolman for the four miles of O street each way from Eagle and two miles south. It is hoped that the roads will now be kept in better shape.

Mrs. Geo. Trunkenholz was taken to the hospital at Lincoln and underwent an operation Sunday. She did not stand the strain as well as some, and for a time appeared to be in a very critical condition, but her many friends will be glad to know that she is now progressing nicely and will doubtless soon be on the road to recovery.

The hail storm last Wednesday afternoon was more severe just north of town than we supposed when the Beacon went to press last week. While it did not cover a large area it practically ruined crops who had been planted—especially those that had come up. In some places hail stones were banked up two feet deep following the evening.

A meeting was held at the fire house Monday evening for the purpose of organizing an Eagle ball team for the season. The meeting was quite largely attended by those interested, and the indications are that a strong team will defend the honor of Eagle on the diamond this year. C. W. Crabtree acted as chairman and Ernest Trimble as secretary. E. C. Oberlie was unanimously chosen manager, and will at once go after games. Ernest Trimble was elected captain and will put the pep in the boys when they line up for the fray. Fred Spannle and Valley Trimble were chosen a committee on finance, and they call on those who want to see Eagle have the best amateur ball team in the state to contribute funds in order that the necessary equipment may be had.

## Lighten the LOAD

Farm tractors work under heavy loads—loads that place a strain upon the cooling and oiling system. The choice of a correct lubricant is essential in keeping your tractor on the job the year around—full-powered—equal to the tasks you demand of it.

Our Tractor Oils are manufactured for this specific service. Excessive engine heat does not affect their body—exactly the right body to seal in every ounce of power and to reduce friction and wear. They cut overhauling and repair expense.

Our experts have made a study of the tractor lubricating problem. They have found STANOLIND TRACTOR OIL best suited to a majority of tractors, *Polarine Extra Heavy, Polarine Heavy and Polarine* being recommended for quite a number. For the proper oil to use in your tractor—consult your Stanolind dealer or write us.

## CONDITIONS CONTINUE FAVORABLE AT RIVER

From Friday's Daily.

The situation in regard to the threatened break of the Missouri river through the rip rap on the east side of the river is still favorable to the railroad company who have been taking energetic steps to see that the inroads of the current are checked.

Division Superintendent N. C. Allen of Omaha and his force of workmen are still on the job, and A. F. Hedegren, master carpenter of the Omaha division also has a force of men at work there. Yesterday E. Flynn, general superintendent, and F. R. Mullen, superintendent of the Lincoln division, were at the scene of action looking over the work being done to stop further washing away of the land.

It is now thought that the railroad company has the situation well in hand as there are a large number of men as well as much material on the scene of action to be used in the work of checking the progress of the attempted washout of the rip-rap.
