

Better Than Pills - For Liver Ills

Mrs. Linda Harrod Endorses Chamberlain's Tablets. I suffered for years with stomach trouble and tried everything I heard of but the only relief I got was temporary until last spring I saw Chamberlain's Tablets advertised and procured a bottle of them from our druggist. I got immediate relief from that dreadful heaviness and pain in the stomach after eating. Since taking two bottles, I can eat anything I want without distress.

Ida Estee, daughter of Henry and Lucrecia Estee was born in Peoria county, Illinois, May 23, 1859. Here she resided with her parents until 16 years of age. In 1875 she with her parents, removed to Milton Junction, Wis., because of the educational advantages offered at Milton college was located at said city. On November 27, 1884 she was united in marriage to Frank H. Burdick at Milton Junction, Wis. To this union 8 children were born 4 sons and 4 daughters. Three children preceded her to that heavenly home. She had been a member of the Baptist church since young womanhood. About 4 years ago she with the family removed to Wabash where she placed her membership with the Baptist church and was found at all times willing to do service for her master. She was a faithful wife, a kind and loving mother, and a true Christian. She passed to her reward June 28, 1920 at 3 p. m., aged 61 years, 1 month and 5 days. She leaves to mourn her departure, her husband, Frank H. Burdick, sons Howard and Ross of California, daughter Lina of Colorado, Marjorie of Murdock and son Laurence of Wabash.

Dearest sister though has left us and thy loss we deeply feel. But 'tis God that has bereft us. He can all our sorrows heal.

Funeral services were held from the Baptist church at Wabash, Neb., Wednesday, June 30, at 2:30 p. m., conducted by her pastor, Rev. W. A. Taylor of Union, Neb. Interment in Wabash cemetery, 1 mile west, 1-2 north of Wabash.

On investigation it was found to be a mother civit cat with her five young kittens. Of course Bill called Ed and some of the rest of his neighbors to witness the spectacle. Of course they watched their queer antics for awhile and it was indeed amusing. From all appearance, so to speak, it seemed as though the old cat was trying to "shake" her family, they being considerably over half grown. After due consideration and in behalf of the fact that there were many chickens on all sides that it was wished to make fry out of, the old shot gun was put into play and the cats were assassinated.

Advertisement for bumper crop in prospect this year. Includes text: 'BUMPER CROP IN PROSPECT THIS YEAR Outlook Much Better Than in Earlier Forecasts—Heavy Harvests to Be Rife. Washington, July 9.—Forecasts of heavy harvests of the country's principal farm crops marked the July report of the department of agriculture today. The prospective yield in most instances is larger than the average production for the five years, 1914-18, while tobacco and rice production promises to be the largest on record, tobacco with 112,000,000 pounds more than the previous largest crop, and rice with 11,000,000 bushels more than ever produced. Compared with last year's output, this year's winter wheat, rye, corn, sweet potatoes, peach and hay crops give indications of being smaller. Larger crops than last year are forecast for spring wheat, oats, barley, white potatoes, tobacco, flax, rice and apples. Throughout June better weather conditions increased the prospects of the output of every important crop. The improvement was reflected in a forecast of 28,000,000 bushels more in the combined winter and spring wheat crops than estimated a month ago; seven million bushels more oats, 8,000,000 bushels more barley and 2,600,000 bushels more rye. The spring wheat crop is larger than last year's by 82,000,000 bushels, but the winter crop is 114,000,000 bushels smaller, although it is only 45,000,000 less than the five year average production. Wheat of last year's crop remaining on farms July 1 was reported as 47,756,000 bushels, or more than 5 per cent of the crop. That, added to this year's prospective production, makes available about 856,000,000 bushels of wheat which, according to officials, will be ample to meet domestic requirements and leave a surplus for export. The condition of the corn crop was reported not so good as a year ago, but the area planted shows an increase of 671,000 acres. Indications are the crop will be 138,000,000 bushels smaller than last year's but 19,000,000 bushels larger than the five year average. FURNITURE AND RUGS FOR SALE One Angle Persian rug, 3x6.
