They had excellent fishing and somewhat of rain with the sunshine of the north climate, and on their return trip found some foul weather. They found in Iowa and Minnesota, some of the best of roads, with gravel surface which was a joy to ride over. They were in fact much pleased with the way the roads were kept up.

Making a Good Business Place

The new building of the Farmers and Merchants bank, which is just now nearing completion is to be a modern counting house, and is so arranged as to make a very convenient and pleasant place to work as well as for the clientele to do business. They have a vault which is divided with a series of bars separating the portion which is used by the bank proper, from the one which is for the customers safety deposit boxes. There is a door for entering each compartment separately. The flooring inside the counter space is laid in oak, while that in the rotunda and dust of stormy days are excluded and the cold of winter as well. The building is very neat in appearance and convenient in every detail and is a credit to a city of larger proportions than Murdock.
