lowed a conference which he held at Washington recently with Senator Harding, at which it is understood the republican nominee for president discussed with him the possibility of ratification completed by the republican legislature of Vermont.

In giving his reasons for refusing again to call a special session Governor Clement said the proposed amendment clearly invades the constitution of Vermont; that the present legislature was elected before the question of ratifying the federal amendment had arisen, and that the people of the state have had no opportunity to express themselves on the issue.

The governor proposed that the matter be taken up by the next legislature and urged that candidates for election be required to declare themselves on it.

Governor Clement's proclamation asserted that as "it stands and is interpreted by the supreme court today, the federal constitution threatens the foundation of free popular government."

"Lobbied" Through Congress
The Seventeenth amendment to the constitution, he said, had been lobbied through congress and state legislatures, by federal agents, and the Eighteenth amendment had been forced through by "powerful and irresponsible organizations, operating through paid agents."

"It is now proposed to force through the Nineteenth amendment for woman suffrage in the same manner and also without the sanction of the freemen.

"I have been asked to overlook these considerations as a matter of party expediency, but this is a matter of principle, not expediency, and the party that invades a well established principle of popular government will suffer to the end."

WELLAND CANAL TO RIVAL PANAMA

Waterway Being Reconstructed on Vast Scale.

OPENS WAY FOR OCEAN SHIPS

Cost is Estimated at \$90,000,000, but May Exceed This Figure Before Work is Completed—Will Be Three Miles Shorter Than Present Canal and Have Minimum Depth of 25 Feet.

While the Panama canal will always rank as one of the world's greatest artificial waterways and probably the greatest engineering feat of all time, Canada is to have a canal that will run it a close second. In fact, there is one lock which lifts in the new Welland canal that is higher than any in the Panama canal. The whole construction is massive and the cost is to be stupendous—the estimate is \$90,000,000, and the builders figure on the job lasting four or five years longer; so there is a chance for costs to pile up in ways not dreamed of.

There has been a canal connecting Lakes Erie and Ontario for three-quarters of a century, but the present project is virtually a new one, although in the greater part of its length it occupies the original sites. Since the canal was first opened it has been enlarged from time to time until when the new work was started in 1913 it had a depth of 34 feet, with 25 locks, each capable of handling a vessel 270 feet long. When finished this time it will be about three miles shorter, have a depth of 25 feet at the shallowest point, be 200 feet wide at the bottom, and instead of 25 locks will have a total of seven, each large enough to handle vessels 800 feet long. Each lock will lift a boat 49 1/2 feet, and one with a triple lift, has a combined height of 139 1/2 feet, which is greater than any Panama lock.

Opens Way for Ocean Ships.
The portion of the canal that is entirely new begins at Port Dalhousie, the present Lake Ontario terminus, and strikes the old route about five miles inland. From there on to Lake Erie the work is reconstruction, strictly speaking. The country through which the new part has been cut comprises some of eastern Ontario's best fruit farms before 1913.

Ocean-going freight ships can come from any port in the world direct to any great lakes port when the canal is completed, and certain dredging operations now in progress in the St. Lawrence river are done. Lake Erie is 326 feet higher than Lake Ontario, and before the first canal was built Niagara falls barred direct water traffic between the two.

The canal is wholly in Canada and runs almost due north and south about a dozen miles west of Niagara river. At present the time of transit required for a boat, which must not be more than 270 feet long nor of more than 14 feet draft, is 15 to 18 hours. In the new canal boats 800 feet long and of 25 feet draft can be transferred from one lake to the other in eight hours. It is estimated that a boat can be run into a lock, the lock filled, and the lift completed in 20 minutes.

A Big Figure Project.
Some idea of the magnitude of the undertaking can be gained from the following specifications printed in the Toronto Globe: At Toronto the flight of three double locks and a fourth lock just above them, with a total depth of 186 feet, must be hewn from solid rock. At Port Weller, one of the largest harbors in the world is being constructed. It is artificial in every respect. Two earth embankments made from excavations, extending a mile and a half into Lake Ontario, giving a basin with 30 feet of water at the lowest stage. The harbor will require the placing of 8,000,000 cubic yards of material. At the outer end of the embankment piers 700 feet long will be built, laying a 400-foot passage for the entrance of vessels. For a mile from the Port Weller entrance the canal will be 800 feet wide at the bottom, with a minimum depth of 25 feet. A pier 3,000 feet long will extend to the first lock and be used for dockage purposes. The entrance piers are founded on concrete cribs as big as dwelling houses. Nineteen of these cribs are already completed and in position. At least 30 more will be required.

The present Lake Erie terminus at Port Colborne will be retained, with a few changes, large when viewed alone, but insignificant when looked at from the standpoint of the undertaking as a whole.

All locks are to be built as twins so as to allow ships to pass each other without waste of time.

Housewives to Cut Bread Cost.

SIR BASIL ZAHAROFF IS "MAN OF MYSTERY"

European Philanthropist Reputed to Be the World's Richest Person.

Sir Basil Zaharoff, G. C. B., G. B. E., who is to visit the United States soon on a special financial mission, is a man of mystery, Edgar C. Middleton writes in the Sun and New York Herald.

Resident of London, Paris, Athens, Madrid and Monte Carlo, amasser of magical millions and plotter of sensational philanthropic surprises, his is perhaps the strangest tale of riches and romance in the history of the modern world. He is Greek by birth, but French by choice of naturalization. In the war, at one time and another, he was instrumental in saving France, Britain and Italy from financial chaos, particularly France.

Like every man of outstanding genius, the "millionaire of mystery," as he is called in Europe, cherishes his own pet idiosyncrasy. He hates women. The wealthiest man in Europe, possibly in all the world, at sixty-five he remains a bachelor. Modern aids to labor are equally anathema to him; he has no use for automobiles—he has never ridden in one; he has no use for typewriters; no letter bearing his signature has ever left his presence otherwise than in pen and ink. His secretary writes in long hand from his dictation, while he adds his signature in a different ink. He has not flown and swears he never will fly in an airplane.

Yet he recently established a chair of aeronautics in the Sorbonne and a similar chair in the University of Petrograd. He gave \$125,000 to the London university for a chair of flying and a like amount to Oxford for a chair of French. He presented \$100,000 to a fund for training French athletes for the Olympic games. He gave \$2,500,000 a year to the Greek government during the Balkan wars. From him for the establishment of a radio-telegraph station, while judicial leas have been provided by him in nearly every capital of the world.

Philanthropy is the one relaxation he permits himself. It is characteristic of the man that, while his gifts are enormous, the lucky man or woman to whom they are made rarely knows their source.

Zaharoff has a habit of descending suddenly on deserving charities. Without any foolish preliminaries he will demand how much they require, why the amount is required and for what purpose it will be used and makes out a check for the amount on the spot. Then he disappears as mysteriously as he came.

INSECTS AS WAR WEAPONS

May Be Used to Spread Disease in Enemy Country, Scientist Says.

The mosquito, the housefly, the louse and various other disease-carrying pests may be used for the dissemination of deadly germs in enemy territory in the next war, according to Prof. Maxwell Lefroy, an English scientist.

"The insects could be transported by airplane, the scientist says. The mosquito could spread yellow fever, the housefly cholera, dysentery or enteric and the louse typhus, Prof. Lefroy asserts.

POLES VICTORIOUS OVER THE RUSSIANS

Warsaw Armies Smash Bolsheviks in Pripet and Volhynia—Soviet Forces Reach Outskirts of Minsk

Warsaw, July 12.—Victories for the Poles in the Pripet region and in Volhynia are reported in advices received here today. The bolshevik cavalry leader General Budenny, has been defeated, the advices stated, and he is fleeing to Rovno, upon which the Poles are marching.

The victory of the Poles in the Pripet region is described as "complete". Enormous supplies are declared to have been taken with the occupation of the town of Ovrunez, where 200 prisoners also were picked up.

The troops operating against General Budenny, the advices report, captured Great and Little Zyion, taking eight guns, while a bolshevik cavalry brigade was annihilated.

Bolshevik attacks south and west of Rovno were repulsed, the message adds.

The bolsheviks, after occupying Smolewicz, to the east of Minsk, have reached the trenches bordering Minsk, where fighting is in progress, says the official war office communique.

Americans Leave Vilna

Polish detachments have been forced to abandon the line along the river Vilja, it adds.

The American Relief association and the American Red Cross have completed evacuation of Vilna in the north and of Lemberg on the southern front. At last accounts the bolsheviks were forty kilometers from Vilna. Extensive preparations have been made for that city's defense. Lemberg is not yet in danger.

The bolsheviks have occupied Poniatyce and Ciazyne and are approaching Molodetchna. They are pressing the attack despite enormous loss, the statement says.

Americans and other foreigners here are considering emergency plans should bolsheviks menace the city. The Red Cross and other welfare organization members today discussed plans for the evacuation and also for the care of American property.

Yank Vets May Fight

Colonel Harry Gilchrist, chief of the expedition to combat typhus, has called a meeting to organize a chapter of the American Legion. The question of offering the services of the legion to Poland will be discussed. Legion members will guard the American property and look after the Americans who may remain. It is estimated that there are 200 Americans, former service men, here.

Poles Dislike Allied Note

Spa, July 12.—The Polish delegation at the conference here is understood to be very much dissatisfied with the terms of the allied note to the Russian soviet government proposing an armistice between the bolshevik and Polish armies. They feel, however, they will be obliged to accept.

Dispatches have announced the sending of a proposal by the allies to Moscow for an armistice, with Poland on conditions that the Poles retire within the natural Polish frontier.

Miss Edith Martin departed yesterday afternoon for Louisville, Kentucky, where she will visit for some time in that city.
