Buying Grain and Stock!

Farming only pays when the man who manages the farm receives at least one half of the net income from the farm.

Grain and stock should be bought by individual buyers who take an interest in keeping posted on the market.

Co-operative associations will never be a success until they sell at least one-half their stock to their managers.

Bring your Grain and Stock to us. Thirty-six years' experience on "market conditions" and "grading up" grain. Free to our customers.
