Was Sure Good Corn
We examined some corn at the store of W. H. Puls which was raised by our friends H. J. Tilson, and was of the yellow dent variety and was about as fine corn as one would care to see. Mr. Tilson informs us that the corn will go seventy-five bushels per acre. Besides raising this excellent corn, Mr. Tilson has also grown a quantity of broom corn which is fine and which he will make into brooms later. He has been busy when not otherwise employed in making brooms and has placed on the market some of the best brooms in the state. The brush as the material which is used for the making of brooms is called, is now pretty high, selling as high as 22 cents per pound. This makes \$440 per ton. This crop will average from 400 to 500 pounds per acre, it looks like it would pay some one to raise some of the article.

Did You Notice the Windows?

We were struck with the unique manner of dressing the windows at the Murray Drug company on our visit this week. With considerable labor Mr. McCracken had build-

ed a house, a hog barn and a windmill, which he made in a barn yard and then lined the space for fencing with the different kinds of stock and poultry foods, tonics and medicines. Take a look at the window. It is a good advertisement within itself.
