Backed by Much Wealth

School district number seventeen, which comprises Union and vicinity, has an assessed valuation of \$1,115,245, which is a good sized sum from which to secure funds for carrying on the school work. The schools here are known for their proficiency and the manner in which they are maintained and those who attend have the opportunity of gaining a good, practical education right here at home. Such advantages are not often available in towns of this size and our citizens and taxpayers should take pride in the school system that has been built up here.

The district has an excellent building, which was built not so long ago, and the bonds on which will be paid off in the near future. When these are liquidated the financial condition of the district will be in excellent shape and such as to permit the securing of even better facilities for educating our boys and girls—who, by the way, will be the men and women of tomorrow.
