Did Not Stay Long. A very smooth gentleman dropped off the train in Murray last Monday, seeking employment. He was known to a few of the younger men that he would like to fight onto a crap game if it were possible. He was informed that he could be steered to such a gathering, but that as the election had just been held and a new and very ambitious citizen had been selected, constable in the person of J. A. Scotten and that it would be a pretty risky piece of business to engage in the pastime. The boys told the smooth guy that they would risk the game if he cared, and he did not care so at that time, while the newly elected constable had been notified and when the game had just gotten under way with the stranger handling the dice, calling 7 come 11, Mr. Scotten appeared at the window and then there was a scattering of everybody, with the stranger going under the bed in the back room. The newly elected constable entered the room and called loudly, "where is that man?" The work is being done by J. A. Scotten and Ralph Kennedy, and is a good piece of workmanship. After the partition has been enclosed and rounded with rods, which are being prepared by the capable blacksmith, Mike Rys, a portion of the dirt in the bottom will be excavated and a deeper bottom constructed which will lead to the dump under the main portion of the structure, thus affording the handling of the grain with as little work as possible. When completed the structure will have about a 10,000 bushel capacity.
