GREAT JEWEL THEFT PRESENTS MYSTERY

Mrs. Janney's Secretary and Son-in-Law Are Suspected of Taking the Jewels.

Mrs. Samuel Van Zile Janney was mysteriously robbed last night of jewels valued at \$50,000. The job was done by someone who knew the combination of the safe, and might have been performed after midnight, or earlier in the evening while the Janneys were the dinner guests of Mr. Richard Ferguson and his mother.

The detectives have failed to unearth a single clue. Miss Esther Maitland, Mrs. Janney's private secretary, is the only member of the household who knew the combination and in her Mrs. Janney says she has absolute confidence.

This trust, however, was considerably shaken when a mysterious telephone conversation was overheard between Miss Maitland and Chapman Price, the husband of Mrs. Janney's daughter. Mr. Price left home yesterday afternoon after a bitter quarrel with his wife.

Further developments in this interesting robbery case will be unfolded on the screen at the Parmele Theater Sunday afternoon and evening, when Blanche Sweet will be seen for the first time in "The Girl in the Web," her newest Jesse D. Hampton-Pathé feature.

CONDITION OF CROPS IS GENERALLY GOOD

Some Wheat Seems to Be of Poorer Quality Than Last Season, But Other Crops Are Fine.

The general crop conditions throughout this portion of Cass county are reported as being generally favorable as reported by several of the leading farmers of this locality. The only departure from the general favorable condition is that of a portion of the wheat crop that is reported as showing some signs of weakness as the wheat is not as strong and sturdy as last year and the stocks in a number of cases appears light and inclined to show signs of having suffered from weather conditions. Just how much this condition prevails has not been fully determined as the farmers have not all made close examinations of their fields.

The corn conditions are of the best is the general report and the wheat crop one of the best that has been reported in this locality for a great many years and one that cannot help but produce a large and very favorable crop for the farmer.

Despite the cold weather that was thought to have seriously affected the potato crop the yield this year looks in fine shape and generally it is most favorable with all indications of producing a large yield per acre.
