Mrs. James Hatcher is to be given a great deal of credit for the manner in which she trained the children for the childrens day exercises which was held at the Christian church a short time ago. Last Tuesday morning John Berger, who has been in the west for more than 28 years, and has made his home near Lindsay, California, where he is an extensive fully grower, having a number of orange and lemon groves which are a very profitable bit of property. Speaking of the town of Murray when Mr. Berger departed, he has to say that there was but one store here at that time and that was conducted by S. G. Lois Wilson Welcomed Back Home. Star Who Was Once an Ordinary School Teacher in Birmingham Gets Great Ovation.

Lois Wilson, the pretty screen actress, who plays a leading role in "Midsummer Madness" at the Parmelee Sunday, Monday and Tuesday, June 26, 27 and 28, had a "welcome home" party the other day. She took advantage of a short vacation to journey back to Birmingham, Alabama, and for the first time since she began her screen career visited old friends and relatives there. Making personal appearance in several of the theatres, Miss Wilson was given a royal welcome everywhere.

It was quite different from the old days in Birmingham, when lovely Lois was just a school-marm, holding down a job in the public school by disguising the fact that she was younger than her oldest pupil. Giving up teaching for a screen career on the advice of Lois Weber, the well known woman film producer and a close friend of the Wilson family, Miss Wilson is now playing important parts in Paramount pictures. In addition to her role in "Midsummer Madness," she is cast as the feminine lead in the screen version of Sir James M. Barrie's "Sentimental Tommy."

GETTING BOARDS TO HELP IN TAX WORK

Send in Copies of Proceedings of Board of Equalization Thus Affording a Complete Check Up.

Although the state legislature, when it had the new revenue bill under consideration, was too busy and hurried to accept a suggestion of State Tax Commissioner Osborne that a provision be inserted requiring court commissioners when sitting as a board of equalization to send to the state commissioner a copy of their proceedings, Mr. Osborne is finding the members very cordial in accepting his request to send it anyway.

The purpose Mr. Osborne has in mind is to check these up so as to take note whether any irregularities have crept in errors that in past years have required these boards to convene again to undo something done without authority. The boards are constantly changing in membership and the members do not possess an acquaintance with the taxation laws that enables them to do their work without error, in many cases. The new plan, which is working out well, enables Mr. Osborne to put his finger on an irregularity, innocently made and correct it before anybody can take advantage of it or some action be necessary.

The list sent out from the department says: "To the county clerk addressed: In order that this department may keep closely in touch with the taxing authorities of the state relative to the equalization of property between individuals as well as between counties, it will be necessary that we have some information regarding the procedure of county boards of equalization.

"Therefore, we would request that in writing up the proceedings of your board of equalization, you will make an extra carbon copy and mail to this department. I do not think this will cause you any more work and it will aid us materially in making the proper equalization for the state.

"I hope that as soon as convenient after the adjournment of your board of equalization you will complete your abstract and immediately send to this department in order that we may complete the compilation of the several abstracts for the state board of equalization.

"If you have any questions regarding the procedure of your board of equalization, you will find it to your advantage to write to the state board of equalization, care of the county clerk, at Plattsmouth, Nebraska.

"Very truly yours,
J. W. Tulene, State Tax Commissioner.

Corn Cost 49c to Produce

The 1920 corn crop cost an average of 49 cents a bushel to produce in one of the central counties of the state, according to figures recently published by the College of Agriculture. The average cost was figured from records kept by members of the county farm bureau. The figure is considered conservative, as the work was charged for at a comparatively low rate and no allowance was made for interest on investment. The yields of the farms studied ranged from 35 to 50 bushels to the acre and the cost per acre varied from \$9.82 to \$21.70. The man whose corn cost but \$9.82 used hogs to harvest the crop, thereby saving the cost of husking and probably marketing his corn to better advantage. The figures not only shed light on the cost of producing crops, but they contribute interesting facts on farm management. The number of farmers hogging down their corn is increasing every year and these figures strengthen the position of those who believe the practice economical.
