The Communities Welfare!

The banking business is one of more than ordinary interest to the community in which the institution is located.

To make the work of the bank most effective, there must be a confidence between the bank of its patrons, and between in fact the whole community.

Any fear of a financial institution is immediately reflected in the business of the whole community.

The bank which has proven its worth to the community is the one which has stood the test of good and adverse times and stands ever ready for the service of the whole community.

The patrons' interest and the community good is the bank's first concern. We are here for the service of the entire community.

Thanking you for your confidence, co-operation and earnest work for our community, we invite your business.

ATTORNEY GENERAL AFTER SLICKERS

Davis Writes Presiding Judge He Will Ask District Court For Blue Sky Investigation

Lincoln, Neb., Oct. 13.—Attorney General Clarence A. Davis announced today that he would call on the judges of the district court of Lancaster county and the excellent results which he will be attained thereby," had impelled him to ask the judges for an investigation.

His action follows a letter from the county attorney last Saturday in which the county attorney, pointing out the cost of grand jury impanelment to the taxpayers, asks the attorney general to pay half the expenses from a special state fund and furnish a special prosecutor. The attorney general's reply was that he himself would assume full responsibility for the grand jury investigation but that he was unable to furnish funds for that purpose.

Attorney General's Letter. This is the letter Attorney General Clarence A. Davis addressed today to E. J. Clements, presiding judge of the district court of Lancaster county:

"My dear sir, I am addressing you as presiding judge of the third judicial district.

"Subsequent to the adjournment of the recent grand jury impanelment in the district court of Douglas county, there has been a great deal of agitation for the impanelment of a similar grand jury in Lancaster county. In the relatively brief examination of recent developments in this county, which I have been able to make in the last week and the rumors which have been persistent for several weeks past concerning irregularities in the conducting of the affairs of certain corporations in Lancaster county, I am convinced there is sufficient material in this county to justify the impanelment of a grand jury.

"I have reason to believe that the affairs of many corporations have been most grossly mismanaged by the officers and directors thereof and that large numbers of unsuspecting investors have been led into enterprises of a nature which is at least questionable."
