MARINE ENGINEERS STRIKE?

New York, Oct. 17.—Marine engineers are voting on a strike to come coincident with the walkout of railroad unions, Thomas Nealy, one of the union chiefs, said today.

A strike among the marine engineers would further cripple New York's communication with the outside world, water transportation having been depended upon to get food to the city in case of a rail tieup.

Dr. Royal Copeland, city health commissioner, today warned against using the strike as an excuse for charging exorbitant prices for food and fuel.
